Please submit the BCBA ONLY Plan of Study to Dr. Jerry D. Ulman at julman2@bsu.edu for approval.

Guidelines for Completing the Plan of Study

Students holding a master's degree who wish to become a Board Certified Behavior Analyst may satisfy the coursework requirement to become eligible to sit for the BCBA exam by completing a sequence of five courses listed below. The Behavior Analyst Certification Board (BACB) has approved the following five courses and therefore, they must be reflected in your plan.

SPCED 609: Introduction to Applied Behavior Analysis (3)

SPCED 610: Behavioral Consultation (3)

SPCED 611: Advanced Applied Behavior Analysis (3)

SPCED 619: Professional Issues in Applied Behavior Analysis (3)

SPCED 660: Seminar in Verbal Behavior (3)

Students can start the sequence of courses any semester. SPCED 609 is the prerequisite for the other four behavioral courses—which may be taken in any order, concurrently or successively. The other two requirements to become eligible to take the BCBA exam are a master's degree in a human service field (acceptability of which is determined by the BACB) and the accumulation of BCBA-supervised field experience (for details, go to the BACB website: bacb.com). The field experience may be accrued at any location where a BCBA is available to provide supervision and may commence as soon as the student has registered for SPCED 609.

Students must complete SPCED 609 before they can enroll in SPCED 610 or SPCED 611. SPCED 610 and SPCED 611 can be taken in any order or concurrently.

Please attach your Plan of Study to an e-mail and send to Dr. Jerry D. Ulman at julman2@bsu.edu. Please send it as a Microsoft word document.

You must be admitted to the Graduate School prior to completing a plan and having your plan approved.
