# Test Scores by Racial or Ethnic Group - Old Race/Ethnicity Categories Chart (IPEDS) FOR FIRST-YEAR STUDENTS GENERALLY AND FIRST-YEAR STUDENT-ATHLETES ON ATHLETICS AID*

**Operating Principle 2.1, Self-Study Item No. 7**

Calculate and provide the average (mean) standardized test scores for all first-year students and first-year student-athletes who received athletics aid* (include nonqualifiers who were ineligible for athletically related aid) during the four most recent academic years, by racial or ethnic group. Report all scores as either recentered SAT or ACT sumscores. Individual student-athlete scores should be converted using the conversion chart before the average (mean) test scores are calculated. If possible, this same procedure should be used in converting the scores of first-year students generally. Otherwise, the average score for first-year students generally may be converted using the conversion chart. List the most recent academic year's data first and include all first-year students entering the institution during the year.
