Bowl Bound: In their first post-season bowl appearance since 1996, the Cardinals will compete in the International Bowl in Toronto, Canada, to battle the Scarlet Knights of Rutgers, January 5. See the story in Sidelines, page 26.
“Many people will walk in and out of your life; but only true friends will leave footprints in your heart.”

Reading a holiday greeting from a dear friend who included those words of Eleanor Roosevelt in his message, I was reminded of the events and people who have left footprints in my life. I reflected about how fortunate I am to have the opportunity to enjoy and appreciate the company of friends and family; to engage in a free interchange of thought and ideas; and to have the freedom to pursue my life’s dreams.

In a broader sense, the quote applies to our Ball State family. And a thread runs through the stories in this issue of the Ball State Alumnus that illustrates aspects of how this generation, influenced by its past, is leaving footprints for the future.

CEO and president of the Ball State University Foundation, David Bahlmann, and the chairman of its board of directors, Tony Schneider, both credit the success the foundation celebrates today to decades-long donor generosity and a cultural commitment to excellence.

As men’s basketball coach, Billy Taylor, names mentors who molded his life personally and professionally, he states his wish that he may, likewise, have a positive influence on his student-athletes.

Those who are serving in our military are certainly fighting to, as alumnus Mike Ogden says, “leave a legacy of strength and resolve for our children to emulate.”

By its very definition, the word “sustainability” refers to keeping something in existence, maintaining or prolonging it, and providing sustenance and nourishment. How important it is for us to embrace the ideal of sustainability and leave only footprints for future generations. Ball State takes the lead through a broad range of exemplary efforts.

As you reflect upon the past year and look forward to the new one, may the following words, also delivered by Eleanor Roosevelt, be your guide, as you continue to make footprints through your philanthropy, your work, and your leisure:

“I wish for those I love this New Year an opportunity to earn sufficient funds, to have that which they need for their own use and to give that which they desire to others, to bring into the lives of those about them some measure of joy, to know the satisfaction of work well done, of recreation earned and therefore savored, to end the year a little wiser, a little kinder, and therefore a little happier.”

Pen Point is written by Charlotte Shepperd, Ball State Alumnus Editor.

Alumni Connection
Across Campus
Sidelines
Class Notes
As we began our work in 1990, there was limited precedent for the journey we were about to undertake; what has become, in fact, an institutional form of immersive learning. And it continues to this day. Ball State University has the longest standing commitment to the Greening of the Campus movement within all of Indiana higher education.

This work is the product of support from a long line of administrative, faculty, staff, and student champions. In 2006, President Jo Ann Gora became a founding signatory to the American College and University Presidents Climate Commitment (ACUPCC). And Provost Terry King commissioned the 2007-2012 Strategic Plan, which requires all new campus construction to be LEED Silver Certified and that building renovation seek LEED Certification. That Strategic Plan also calls for the Council on the Environment (COTE) to complete campus-wide unit-level sustainability planning by January 31.

In 1999 President John Worthen signed the Talloires Declaration and in 2000 Provost Warren Vander Hill constituted the 94-member Green-2 Committee to recommend steps for its implementation. This resulted in the creation of the 30-member Council On The Environment (COTE) with broad representation from within the university and the East Central Indiana community. To this day COTE continues to meet on a monthly basis to serve as a clearing house—to celebrate, facilitate, and anticipate sustainability initiatives campus-wide.

COTE also authors resolutions for administrative consideration. These have included recommendations for a university Sustainability Statement, acquisition of hybrid-electric vehicles, LEED Certification of buildings, elimination of mercury on campus, and adoption of a smoking restriction. Recently we endorsed the 2030 Challenge, calling for all new buildings to reduce environmental impact to -0- net carbon load by the year 2030.

The Richard G. Lugar Energy Patriot Award was given recently to COTE, recognizing the work of the full university community, providing educational and operational leadership for national energy security. This joins to other recognition: three National Wildlife Campus Ecology Program Awards, a Sustainable Building Industry Council Best Practices Award, and a top 50 Green School listing in the KIWI Report.

Ball State remains actively involved in the many national organizations promoting this work, as well, including the Association for the Advancement of Sustainability in Higher Education (AASHE), Higher Education Associations Sustainability Consortium (HEASC), University Leaders for Sustainable Future (ULSF), and the US Partnership for Education for Sustainable Development (USPESD).

Our university is uniquely suited to engage this institutional form of immersive learning, in large part because of the entrepreneurial spirit of the campus community. We work across disciplinary lines without difficulty. We consistently seek to involve in our work the full on- and off-campus community—the administrators, faculty, staff, students, and citizens of Indiana.

It is significant that the Ball State Alumnus magazine has chosen to share this story with you, our graduates, and we encourage your feedback and counsel: COTE@bsu.edu.

LETTERS TO THE EDITOR

Deaf education program almost 60 years old

I do not know where you got your information that the deaf education program has been in existence for the past 25 years (“Training for special needs”, September 2007). I started and completed an MA degree, 1968-70, at Ball State in the deaf education program. To me, that's 37 years ago. Are you talking about the teaching and living arrangements of the students and staff as having completed 25 years?

When I was at Ball State, Dr. and Mrs. Twining were the force and impetus for making sure we had a quality education and were prepared to teach hearing impaired students. I spent the next 30 years as a teacher of the deaf and as a teacher/consultant for the hearing impaired.

I'm glad to see the article appeared.

Julia Sermersheim, MA70

Editor's Note: The term "continental United States" is traditionally and more commonly used to refer to the contiguous 48 states and the District of Columbia. The more technically correct definition includes the state of Alaska because it also is in North America. Either definition is considered correct, but to avoid confusion, terms like contiguous 48 states and lower 48 states are often used when excluding Alaska.

Oldest living Derby winner is, and was, Genuine Risk

In the September 2007 issue of the Ball State Alumnus, you referred to Gato Del Sol as the oldest living Kentucky Derby winner prior to his death in August 2007. In fact, Genuine Risk, the 1980 Kentucky Derby winner, was in August and is now, at age 30, the oldest living Kentucky Derby winner.

Martin Klotz, '61
Louisville, KY

Letters to the Editor
On a clear night, stargazers can view a vast sky with more stars than there are grains of sand on all the beaches on Earth, according to Ronald Kaitchuck, professor of physics and astronomy and director of Ball State's planetarium.

Since 1967, the planetarium and observatory have served as great teaching tools, bringing the night skies into context for students, researchers, and the public.

Kaitchuck describes the planetarium experience in simple terms. "The basic idea is that you are sitting under a dome hemisphere, and the machine in the middle, a star projector, will project to the ceiling points of light that accurately, hopefully, reproduce the night's sky."

He explains that the concept is similar to early sky theories. "There was a very common model in ancient writings of the universe that there's a bowl over your head and all of the stars were attached to it or were holes in this hemisphere," he says. "I am about to do that to you. I'm going to put dots on a bowl over your head and you are going to think you are outside."

As many as 8,000 school children visit the planetarium each year to gain first-hand knowledge about the sky, the earth, gravity, orbits, and the solar system through programming that is designed especially for age-specific school groups.

Throughout the academic year, there also are free programs for the general public, ranging from seasonal offerings such as "The Christmas Star," a prerecorded presentation, to "Tour the Milky Way," a live show that incorporates observatory telescopes.

The popularity of some events creates some challenges, Kaitchuck says. With seating to comfortably accommodate 70, Kaitchuck says he sometimes must turn visitors away. "Even people who arrive five minutes early may not get in at all," he says.

Advances in technology have made studying the stars increasingly accessible to amateurs. "Over the years, astronomy technology has changed to the point that small telescopes can do real research," Kaitchuck says. But, he adds that has only added to the interest in programs offered by full-scale planetariums.

On clear nights after programs, planetarium visitors can take advantage of the observatory, situated atop the fourth floor of the Cooper Science Building. With its roll-off roof, the observatory consists of five telescopes, varying in diameter.

In addition to their high-powered capacity, the observatory telescopes also have high-end digital cameras attached which take photos of the sky throughout the night, without an operator.

Astronomy students have the opportunity to participate in scientific research alongside their professors. "I get to use well-equipped telescopes to do bona fide astronomical research," says graduate assistant Joe Childers.

He explains the work he and colleagues have been focused on.

Unforgettable
Ronald Kaitchuck, director of BSU's planetarium and observatory, says the close approach of Mars, August 27, 2003, was one of the more memorable experiences of his tenure at Ball State. "I'll never forget the night," Kaitchuck says. "We advertised that the observatory would be open, and 20-30 people can get up there at one time. That evening, we had 3,000. We were here until 2 a.m."

"The observatory is a floor above the fourth floor. We had lines going all the way down to the ground floor and to the outside doors. People waited in line two-and-a-half hours. It was unbelievable.

"No one was disappointed. We had the event on various telescopes and we had a live feed through a camera that was on one of our telescopes. Visitors were watching it live on a big screen as they got toward the top of the stairs."
Beyond the Class 4-5_rev.indd   5Beyond the Class 4-5_rev.indd   5 12/20/07   4:52:03 PM12/20/07   4:52:03 PM

This summer and fall the kind of research we’ve been doing is called photometry, meaning that we are studying how our targets change in brightness over time.”

Undergraduate assistant Garrison Turner also is participating in the research. “My work has mostly been in the observatory. Typically this summer we spent our time doing research concerning binary star systems and their general properties,” Turner says.

According to Kaitchuck, a subclass-contact binary star system has stars that literally touch as they orbit.

Besides conducting their research at Ball State, Childers and Turner were among a group of students selected to travel this fall to the Kitt Peak National Observatory in Arizona. Ball State, in partnership with nine other universities, shares a telescope at Kitt Peak, Ball State operates the SARA Observatory at Kitt Peak, taken at the SARA Observatory

“Another SARA Observatory is under construction in the Andes Mountains of Chile. The new observatory will double the amount of time Ball State’s astronomy program can access telescopes.

The recent reclassification of Pluto to dwarf star status is one example that the field of astronomy is not static. As research continues, discoveries are made.

A team of investigators in Ball State’s astronomy department has been observing stars that orbit extrasolar planets, or planets that are beyond the solar system. Though these planets cannot be viewed with the naked eye, they can be detected through telescopes when the orbit aligns with its surrounding stars.

Kaitchuck, excited with the ever-improving technology that is changing the face of astronomy, recently gave one of his classes an assignment to verify a prediction. “I never dreamed I would be making that a class assignment, but now we can do it,” he concludes.

Photos are courtesy of the Ball State Planetarium and Observatory.

Looking up

Upcoming astronomical events that can be seen with the naked eye, binoculars, and amateur telescopes:

**February 21—Total Lunar Eclipse.** The eclipse will be visible throughout most of the Americas, Africa, and Europe.

**February 24—Saturn at Opposition.** The ringed planet will be at its closest approach to Earth. This is the best time to view Saturn and its moons.

**April 28—Mars at Opposition.** The red planet will be at its closest approach to Earth. This is the best time to view Mars.

**April 30—Venus at Opposition.** The blue-green planet will be at its closest approach to Earth. This is the best time to view Venus.

**May 15—Mercury at Opposition.** The inner planet will be at its closest approach to Earth. This is the best time to view Mercury.

**May 29—Saturn at Opposition.** The ringed planet will be at its closest approach to Earth. This is the best time to view Saturn and its moons.

**June 10—Mars at Opposition.** The red planet will be at its closest approach to Earth. This is the best time to view Mars.

**June 23—Venus at Opposition.** The blue-green planet will be at its closest approach to Earth. This is the best time to view Venus.

**July 4—Mercury at Opposition.** The inner planet will be at its closest approach to Earth. This is the best time to view Mercury.

**July 10—Mars at Opposition.** The red planet will be at its closest approach to Earth. This is the best time to view Mars.

**July 17—Venus at Opposition.** The blue-green planet will be at its closest approach to Earth. This is the best time to view Venus.

**July 24—Mercury at Opposition.** The inner planet will be at its closest approach to Earth. This is the best time to view Mercury.

**August 6—Mars at Opposition.** The red planet will be at its closest approach to Earth. This is the best time to view Mars.

**August 10—Venus at Opposition.** The blue-green planet will be at its closest approach to Earth. This is the best time to view Venus.

**August 28—Mercury at Opposition.** The inner planet will be at its closest approach to Earth. This is the best time to view Mercury.

**September 2—Mars at Opposition.** The red planet will be at its closest approach to Earth. This is the best time to view Mars.

**September 7—Venus at Opposition.** The blue-green planet will be at its closest approach to Earth. This is the best time to view Venus.

**October 3—Mercury at Opposition.** The inner planet will be at its closest approach to Earth. This is the best time to view Mercury.

**October 11—Mars at Opposition.** The red planet will be at its closest approach to Earth. This is the best time to view Mars.

**October 15—Venus at Opposition.** The blue-green planet will be at its closest approach to Earth. This is the best time to view Venus.

**November 7—Mercury at Opposition.** The inner planet will be at its closest approach to Earth. This is the best time to view Mercury.

**November 13—Mars at Opposition.** The red planet will be at its closest approach to Earth. This is the best time to view Mars.

**November 17—Venus at Opposition.** The blue-green planet will be at its closest approach to Earth. This is the best time to view Venus.

**December 1—Conjunction of Moon, Venus, and Jupiter.** The crescent moon, Venus, and Jupiter will form a 3-degree triangle in the evening sky.

**December 5—Mercury at Opposition.** The inner planet will be at its closest approach to Earth. This is the best time to view Mercury.

**December 12—Mars at Opposition.** The red planet will be at its closest approach to Earth. This is the best time to view Mars.

**December 15—Venus at Opposition.** The blue-green planet will be at its closest approach to Earth. This is the best time to view Venus.

**December 21—Total Solar Eclipse.** The eclipse will be visible throughout most of North America. 

Upcoming events can be found at seasky.org
Professional societies plan job fairs, outings
CAP: The College of Architecture and Planning will host a job fair, Monday, February 25, and Wednesday, February 27, from noon-4:00 p.m., in the atrium of the CAP building.

Journalism: Ball State's Journalism Alumni Society board of directors will meet Saturday, January 12, at the Alumni Center. Agenda items include approval of recommendations for 2008 alumni award recipients and planning for the journalism alumni reunion, which will be on campus, Saturday, June 21.

The board reviews applications for Outstanding Young Alumni, Outstanding Journalism Alumni, and Journalism Hall of Fame honors. The awards are presented during the annual spring Department of Journalism awards luncheon on campus.

All journalism alumni will be invited to the reunion in June. The reunion atmosphere will be casual and will include an opportunity for a campus tour, in addition to a casual decades lunch and group dinner. Details will be forthcoming.

Four new board members have been appointed. They include: Sam Keyes, ’04; Emily Schilling, ’81; Shavonne Tate, ’06; and Greg Weaver, ’83.

Teachers College: Teachers College alumni, family, and friends are invited to attend an outing at the Children’s Museum of Indianapolis, Saturday, March 29. The event is sponsored by the Teachers College Alumni Association. Information will be sent to Teachers College alumni.

The association is accepting nominations for its Outstanding Alumni Award and its Innovative Education Grant.

FCS: The Family and Consumer Sciences Alumni Society hosted its tenth annual Career Development Day in October 2007, with alumni presenting information to FCS students attending eight breakout sessions.

Presenters included: Paige Dowden, ’06; Laura Dragoo, ’06; Lisa Flanders, ’94; Shelley Hall, ’05; Michelle Hancock, ’97; Mandy Hill, ’03; Suzie Huber, ’69; Heather Kammer, ’94; Erica Manship, ’06; Ann Marcucci, ’05; Hannah McConnell, ’06; and Anitra Montgomery, ’05. Also, Amanda Mouron, ’06; Amy Preston, ’04; Meredith Reese, ’04; Jaclyn Shaw, ’06; Eric Sorg, ’04; Janet Stafford, ’76; Kristen Suding, ’06; Elizabeth

BSU welcomes newborns into the Cardinal Family
The Ball State University Alumni Association welcomes newborns into the Cardinal family. In partnership with the Ball State Federal Credit Union (BSFCU), the Alumni Association administers the program.

"Born to be a Cardinal" membership includes a Ball State bib, a magnetic photo frame, and a $10.00 custodial account through the Ball State Federal Credit Union.

BSU welcomes newborns into the Cardinal Family
The Ball State University Alumni Association welcomes newborns into the Cardinal family. In partnership with the Ball State Federal Credit Union (BSFCU), the Alumni Association administers the program.

"Born to be a Cardinal" is designed for babies from birth to 12 months, who are the children or grandchildren of Ball State alumni.

The program was established as an alumni service to recognize the university’s newest legacies, honor alumni families, and promote pride in Ball State. It provides the family a mechanism to save for college through the BSFCU.

Cost of basic enrollment is $15.00. New members in the basic plan will receive a Ball State bib, a magnetic photo frame with the "Born to be a Cardinal" logo, and a $10.00 custodial account opened in the child’s name at the BSFCU.

Members may opt to increase the minimum for their savings plan. Amounts greater than $15.00 will be deposited directly into the custodial account.

The enrollment form is available through the Alumni Association Web site: www.bsu.edu/alumni.

Introducing our new members

- Hannah Garrison, LaFontaine, born November 20, 2006  
  (Scott Garrison, ’93, father)
- Ashtin Gillum, Lafayette, born March 27, 2007  
  (Alyssa Gillum, ’05, mother)
- Savannah Lynn Hammond, Selma, born November 15, 2007  
  (Erin Hammond, ’00, mother; Michael Moore, ’69, grandfather)
- Andrew Kegebein, Plainfield, IL, born March 21, 2007  
  (Michael Kegebein, ’62, grandfather)
- Sebastian Kegebein, Shorewood, IL, born July 26, 2007  
  (Michael Kegebein, ’62, grandfather)
- Thaddeus Lawrence, Indianapolis, born July 25, 2007  
  (Russ Lawrence, ’95, father; Kelli Hahn Lawrence, ’01, mother)
- Noah Lennon, Muncie, born April 4, 2007  
  (Travis Lennon, ’98, father; Cathy Lennon, ’73, grandmother)
- Creed Mackowiak, Indianapolis, born March 16, 2007  
  (Ryan Mackowiak, ’96, father; Kendra Mackowiak, ’90, mother; Edith Pittenger, 33MA61, great grandmother)
- Sebastian Lukas Mathena, Indianapolis, born November 14, 2006  
  (Beverly Hoffmeister, ’64, great grandmother)
- Makenna Kate Smeltzer, Fort Wayne, born September 28, 2006  
  (Sue Taylor, ’71, grandmother)
- Emery Elizabeth Vulgan, Bradenton, FL, born June 22, 2007  
  (Anthony Vulgan, ’94, father; Raymond Vulgan, ’68, and Lesley Vulgan, ’70, grandparents)
Sumner, ’03; and Beth Switzer, ’85.

The event included sessions regarding internships with Ball State alumni and other professionals participating. Alumni panels included: Barbara Norrick, ’77; Eric Sorg, ’04; Laura Hornmuth, ’05; Laura Dragoo, ’06; Jane Hughes, ’79; Candy Ground, ’70; Elizabeth Poore, ’91MA00; and Heather Kammer, ’94.

The FCS Alumni Society board of directors will meet at the Alumni Center, Tuesday, January 29, to plan the society’s spring alumni awards brunch, set for Saturday, May 17.

MCOB: The Miller College of Business Alumni Society board of directors elected five new members for 2008. They are: Rebecca Baer, ’99MBA95; Carl Davis, ’03; Karen Mangia, ’97MS98; Clarice McCauley, ’90; and Joe Milazzo, ’77.

The board will host a reception preceding the Indiana Pacers game, Wednesday, February 20, for Ball State business alumni. Details about the reception and game tickets will be mailed.

The annual MCOB Dialogue Days will be Tuesday and Wednesday, March 4-5. Business alumni who wish to speak to a class about their careers should contact the BSU Alumni Association or Tammy Estep, ’86MBA92, in the college.

Rod Davis, ’69MAE70, continues to serve as interim dean of the Miller College of Business. Officers are Kevin Walbridge, ’82, president; Michael Earley, ’78, vice president; and Jim Ittenbach, ’71, Alumni Council representative.

NREM: The Natural Resources and Environmental Management Alumni Society will host its seventh annual Internship and Career Fair at the Alumni Center, Tuesday, January 22, from noon until 4:00 p.m.

Alumni professionals in fields that relate to NREM, biology, geology, geography, chemistry, political science, and landscape architecture will participate. They will greet students, convey information about their professions and places of employment, and offer applications for internships, summer employment, part-time, or full-time employment.

To participate, contact the Alumni Association by Tuesday, January 15.

The NREM Alumni Society board of directors will meet after the event.

Alumni chapters plan area winter outings

Adams-Wells: Fred Hoffman, ’87, and Stan Kunkel, ’78, are co-chairmen of the family bowling outing, set for Sunday, February 10, from 2:00-4:00 p.m. at the Bowling Center in Bluffton.

Reservations, due by February 6, can be made by contacting Hoffman, (260) 589-2682, or Kunkel, (260) 824-9966.

The board elected Don Kitson, ’91, president and Hoffman, vice president. Shelly Eisenmann, ’93, and Mike Pettibone, ’76, will continue as board members.

The next board meeting will be Wednesday, January 15, at 6:00 p.m. at Billy Ann’s Restaurant in Bluffton.

Greater Indianapolis: The Greater Indianapolis Area Alumni Chapter will host three annual winter events. The Indiana Ice Outing is scheduled for Saturday, January 12, at the Pepsi Coliseum in Indianapolis. A pre-game party will take place in the Ice House Room at 6:00 p.m. The Indiana Ice vs. Waterloo Black House game will begin at 7:05 p.m.

Saturday, February 9, the chapter will sponsor Casino Night at Jillian’s in Indianapolis. Doors open at 6:30 p.m., with faux gambling from 7:00-9:00 p.m. and a prize drawing at the end of the event.

The third outing is set for Sunday, March 2, at the Indiana Repertory Theatre for a production of August Wilson’s “The Piano Lesson”. A pre-show reception will be from noon until the play starts at 2:00 p.m.

Northeastern: The Northeastern Indiana Alumni Society will host its annual TGIF, Friday, February 15, from 5:00-7:00 p.m. at Columbia Street West in Fort Wayne.

The society’s annual Science Central family outing is scheduled for Sunday, February 24, from 1:00-4:00 p.m. in Fort Wayne.

The third outing is set for Sunday, March 2, at the Indiana Repertory Theatre for a production of August Wilson's “The Piano Lesson”. A pre-show reception will be from noon until the play starts at 2:00 p.m.
Reconnect with old friends in a new way with the BSUAA

Read our blog
A great way to keep tabs on what's happening with the Alumni Association is to read our blog. Go to www.ballstateaa.wordpress.com. The blog will keep you current with the latest news.

Facebook: A social networking site, Facebook is the place to learn about local events while providing an easy way to connect with people through personal profiles and shared pictures.

To join, current Facebook users can click on “Groups” and search for “Ball State Alumni Association.” To create a Facebook account, go to www.facebook.com and click “Sign up.”

LinkedIn: LinkedIn is similar to Facebook, but with a focus on business networking.

The main purpose of the site is to allow registered users to maintain a list of contact details of people they know and trust in business. This can help alumni accelerate careers through referral by other alumni and stay up-to-date on what former classmates are doing. To join, go to www.linkedin.com.

Eventful: Eventful allows access to all Ball State events on one site, and also allows alumni to request events. If you want to reconnect with the 1977 chess team or the 1989 French club, for example, request the event and we will try to assist to make it happen! To request an event, or to see what is going on, go to www.eventful.com.

Stay Tuned: Your Alumni Association continues to research new and innovative ways for you to reconnect with alumni and faculty. Soon, it might be possible to sit in on a virtual class taught by your favorite professor, or to attend a virtual alumni event. Keep up-to-date on new developments—go online to www.bsu.edu/alumni.

EDUCATION REDEFINED TOUR INFO

Ball State is dedicated to shaping our students for leadership in the 21st century.

EDUCATION REDEFINED represents more than a tagline for Ball State. It is our ongoing commitment to a tradition of excellence and innovation.

Join President Jo Ann M. Gora and other Ball State University representatives as we share our exciting news with alumni as part of our multicity EDUCATION REDEFINED TOUR.

The Ball State University Foundation had a stellar year in 2007, reaching major milestones and garnering national recognition as the Small Nonprofit of the Year.

In June 2007 the foundation announced it had surpassed four major milestones: $300 million in cumulative contributions, $100 million in total investment earnings, $200 million in university/student support, and $200 million in total assets.

Acknowledging the work of staff and volunteers, David Bahlmann, president and CEO of the foundation, credits the long-term donor generosity for the success. “This extraordinary year is the result of decades of giving by our donors,” Bahlmann says. “Through their generosity, generations of young people get the full impact of the Ball State educational experience.”

Investment earnings showed a five-year average return of 16 percent as of September 2007, ranking the foundation in the first quartile in investment returns among its peers. Based upon performance, investment decisions, and use of managers or consultants, the foundation received the Small Nonprofit of the Year Award in the category of foundations with endowments less than $500 million.

Tony Schneider, 1980 alumnus and chairman of the foundation’s board of directors, says the award recognizes the planning and execution of what he calls decades of work on the part of the foundation. “It is especially gratifying to receive an award like this when your achievements are, fundamentally, the result of a cultural commitment to excellence,” Schneider notes, explaining a key to the foundation’s investment success. “With an eye carefully focused on the future, we don’t shy away from innovation and creativity, and we execute with a purpose.”

Established in 1951 with a $1,000 donation from one of its nine founding board members, the foundation gained a firm foothold under the direction of 1929 alumnus Ralph Whiting. Over three decades, Whiting led the organization as it grew its assets to nearly $10 million. Today, assets exceed $235 million.

Looking ahead, a long-term strategic plan was adopted in 2007, which Bahlmann and Schneider believe will position the foundation to reach new heights. Five new board members also have been appointed. They are John C. Gaylor, Donna Oklak, Randall E. Pond, Michael P. Smith, and Ken White.

Gaylor is president, chief executive officer, and founder of Gaylor Group Inc. A 1976 business graduate of Ball State, Gaylor was honored as a Distinguished Alumnus by his alma mater on numerous occasions, including induction into the Journalism Hall of Fame in 1996 and being named a 2007 Distinguished Alumnus.

Oklak, a 1977 Ball State journalism graduate, Smith has been honored by his alma mater on numerous occasions, including induction into the Journalism Hall of Fame in 1996 and being named a 2007 Distinguished Alumnus.

White, who retired in 2003 as senior managing director of Ernst & Young Corporate Finance, LLC, continues to practice as a consultant. He received his bachelor’s degree in accounting from Ball State in 1971 and has been a devoted volunteer for the university.

Ball State University Foundation staff members David Bahlmann (center) and Thomas Heck (right) accept the Small Nonprofit of the Year Award, along with equity manager Churchill Franklin, October 22, in San Francisco. Selected by the staff of Alternative Investment News and its sister publication Foundation & Endowment Money Management, the foundation won over finalists Florida State University and Kenyon College. Taking “Middletown” to Madison Avenue

Ball State’s Center for Media Design is redefining media measurement research

by Mike Bloxham and Amanda Pollard

The common refrain in the mass media industries for at least the last decade has been about how "everything is changing." Commentators routinely declare the death of the 30-second TV commercial, the demise of newspapers, the end of the broadcast schedule, and the all-consuming rise of the Internet to name but a few of the disruptive developments.

As the number of media options available to us multiplies and as the capabilities of many of them diversify to give us more choices in how we use any one device, the challenge of truly understanding how people are using media is also made more difficult. Just think of all the things you can do with your cell phone or computer, for example, that you couldn’t do a few short years ago. As the challenge grows, the need to rise to that challenge becomes that much more important to the media industries and those seeking to study them or work within them.

The vast majority of dollars spent on media measurement research fall short of understanding consumer media behavior as it generally focuses on one interface at a time. In effect, the research itself is designed to reflect the silos of the industry—TV is separate from radio and radio is separate from newspapers, etc.

Meanwhile, we as consumers use the media in anything but a siloed fashion. The result is that a media executive may gain deep insights into how people are using TV, while knowing little or nothing about how they use print or the Web without turning to different information sources and sometimes contradictory research. This is becoming a key industry issue. Major media owners, advertisers, and their agencies are now looking for answers to the ever-more important questions of who is using which media, where, when, and how often.

To meet these challenges, the Center for Media Design (CMD) developed a systematic observational research method utilizing trained observers to record second-by-second changes in participant media use, life activities, and locations on smart keyboards. The result is a unique record detailing media behaviors which, in turn, inform industry decisions on how best to use media. Over the course of four years, the CMD has logged 10,000 hours of observations for a series of nationally-recognized, innovative reports and white papers.

Middletown Media Studies marked the CMD’s first venture in observational research in 2004 in Muncie, a long-time representative of “Middle America.” Observers followed 101 participants through their waking day to record technology use across media platforms and across all locations.
Major media owners, advertisers, and their agencies are now looking for answers to the ever-more important questions of who is using which media, where, when, and how often.

Outside of our ultimate goal of discerning consumer behavior, we designed a project to test traditional methods of media research including industry-standard personal diaries and telephone interviews while testing our newly created “shadowing” methodology. The study proved that the CMD’s observational method was more accurate in recording participants’ cross-media consumption than both telephone survey and diaries, and the positive response from the media industries demonstrated the study’s worth as a stepping stone for subsequent research ventures.

The July 2005 follow-up study, Middletown Media Studies II, resulted in several highly regard research reports and white papers. For these reports, researchers looked at various issues within the larger topic of consumer behavior recorded during these observations:

- “Media Day” breaks down media usage across the media day.
- Multitasking habits of participants are examined in “Concurrent Media Exposure.”
- “Engaging the Ad Supported Media” looks at issues of concurrent media exposure aggregated based on location, time of day, participant age, etc.
- Researchers analyzed computer use in “The Computer: A Medium for all Reasons.”
- MMSII researchers presented “Mind the Measurement Gap” at the Advertising Research Foundation highlighting specific, observational measurement issues.

After the marked success of both rounds of Middletown Media Studies, the CMD’s observational approach was put to work on a single media platform: television. This approach targeted and logged participant behavior during prime-time hours in five-second increments. The goal was to develop deeper insights into how people really behave when watching TV.

“Remotely Interested? Observing Television Viewers’ Advertising Related Behavior,” was published in September of 2006, first presented in New York during Advertising Week, and became the subject of an article in Admap, the leading international journal of the media industry, in January 2007.

Since the release of our first observational study, we have been consistently asked about plans to conduct similar work with teenagers. The prospect of adding the additional complexity of researching minors, onto our logistically demanding research method was daunting, to say the least, but our own curiosity and continued requests from industry finally encouraged us to take the plunge. The result was a pilot study called “High School Media Too,” published in September of 2007. Though unique in its complexity and focus, this pilot proves the CMD can successfully undertake a larger study of teen media consumption using our observational method while generating significant media attention.

In the industry, we have undertaken observationally based projects funded by Time Warner Global Marketing, Procter & Gamble, Pepsico, and Nielsen’s Council for Research Excellence, a body of the media industry’s leading research practitioners.

To date Ball State’s Center for Media Design remains the only entity conducting observational media research in this way and on this scale. The resulting impact on the university’s reputation in the media industries and academia has been significant, and we have seen a steady stream of visitors as a result. As we continue to build on our work, we do so with the knowledge that we are not only contributing to academic and industry knowledge of how the media landscape is changing, but also that by increasing awareness of the Ball State name in the communications industries, we help give Ball State students an edge when applying for jobs in those sectors.

Mike Bloxham serves as director of insight and research for Ball State’s Center for Media Design. He champions research in media consumption, eye tracking, and usability testing, and is responsible for developing programs at the CMD that deliver innovative research solutions and facilitate industry partnerships. He also was a part of the team that produced Middletown Media Studies.

Amanda Pollard is a student research assistant at the CMD. She is majoring in English literature and will graduate in 2008.

For more information on the reports mentioned in this story and their authors, visit www.bsu.edu/webapps2/cmdreports.
Half a world away, Christmas came early for Ball State alumni Miles Townsend and Mike Ogden. The army officers and former BSU ROTC members reunited, between missions, in Taji, Iraq.

“We both have acquired a few wrinkles and have added a couple of pounds since leaving BSU in 1992,” Ogden says. “But the friendship we forged on campus has withstood both the test of time and the trials of war.”

Another Ball State grad, Captain Russell Boucher, says he has made friends from varied locations and of many nationalities while serving his country in Iraq. “I’ve never been anywhere where there were so many good people dedicated to what they’re doing,” he says.

Even so, Boucher, a 1982 Ball State alumnus, was more than ready to return home to spend the holiday season and the new year with his family, many of whom have attended Ball State. Boucher’s wife Anna, her parents, and all three of his children—Joshua, Erica, and Christina—have taken classes at the university.

Understandably, Boucher’s Ball State pride remains in full force overseas. The captain has made sure Ball State is represented at the U.S. Embassy in Iraq by hanging his alma mater’s flag, among representative college flags from throughout the nation, in the dining facility there.

About returning home for leave after more than ten months abroad, Boucher says simply, “It feels really good.”

Ogden would probably second that sentiment.

An article in the July 2007 issue of the Alumnus reported that Ogden and his wife Tiffani were expecting a third child.

Ogden has kept in touch, writing in early November: “In less than two weeks, my wife will give birth to our third son. Because our country remains at war, I will not be in attendance for this joyous occasion. Once again, my wife and children will demonstrate that the cost of freedom is not cheap, and their willingness to sacrifice remains the currency with which the price of our freedom is paid.”

Ross Henry Ogden was born November 20, 2007, and though Ogden was still in Iraq, he was able to phone just in time to hear Ross’ first breath. “Ross Henry is a name chosen to honor two men in our lives who were no strangers to the concept of commitment and sacrifice,” Ogden says. “Ross is the name of Tiffani’s father, a man who endured the Great Depression and served his country with distinction during the Korean War.

“Henry, a dear friend and mentor we met during our tour of duty in Germany, is a D-Day Veteran who was reactivated for the Korean War even after he had tragically lost his wife and son to a house fire,” he continues. “These men and the lives they led personify what is great about America and reflect the character we hope to instill in each of our boys.”

As his tour in Baghdad moves toward a close, Ogden urges Americans to stand firm.

“Our soldiers continue to relentlessly hunt al-Qaida and the many extremists. Make no mistake about it, after 13 months of hunting these cold-blooded killers, I’ve learned firsthand that our children can’t afford for us to not have the courage and resolve to confront those who indiscriminately kill anyone who dare to confront them. That being said, I’m happy to report that the Iraqi people have [begun to enjoy] unprecedented peace and security and have begun to take matters into their own hands to a degree I honestly did not believe I would see during my tour.”

The visible progress Ogden has witnessed is encouraging, but far from a reason to withdraw, he says. In order to protect his family and his country, he missed seeing his son Drew start walking and talking. But Ogden says he has begun seeing the fruits of his and others’ efforts.

“The continued commitment of US forces and our sacrifices are making possible what many believed to be impossible,” he says. “Arrests of al-Qaida and connected operatives are occurring in greater numbers than ever before,” Ogden says. He adds that Iraqi citizens are taking action.
“A recent tip from a concerned Iraqi citizen led us to the single largest cache ever found, consisting of more than a hundred roadside bombs, rockets, mortars, and other weaponry intended, no doubt, for use to kill and maim US forces and Iraqi civilians alike.”

Ogden and Boucher agree that the role of the US in Iraq is not yet over. Boucher contends: “We understand why [this war is] important.” He warns that terrorism would increase, should US troops leave.

Ogden adds: “Although these recent trends represent great progress, there is still much work to be done. We must take advantage of this hard-fought progress by continuing to improve the quality and quantity of Iraqi security forces, schools, hospitals, factories, and government services,” he says.

“Doing anything less would be a dishonor to those who volunteered and paid the ultimate price to achieve victory. Surrendering would not only pass a great burden on to our sons and daughters, but would embolden those who wish to kill us.

“I propose we choose, instead, to leave a legacy of strength and resolve for our children to emulate, and in the process, make it clear to extremists of all types that the sons and daughters of Democracy are not spoiled by our riches or intimidated by our foes.”

The burden of continuing this legacy falls to men and women like Ogden and Boucher, who make great sacrifices in an effort to protect America and their families.

“It was tough to leave [my home],” Boucher admits. But it’s a sacrifice he says he’s willing to make to ensure his family’s safety back home.

“I don’t want anything to happen to my kids,” he acknowledges.

Boucher stresses the respect he has for his fellow soldiers, a sentiment echoed by thousands of his fellow alumni. He emphasizes that the troops and their families have made great sacrifices in the name of the war on terror and, while commanding the family support at home, succinctly says the troops are, “tremendous people all working for the good of our country.

“These people [I’ve met while serving in Iraq] are just as brave as anybody at any time,” he concludes. And in a new year, filled with certain change, that is something Boucher says Americans can be proud remains constant.

(Above) Russell Boucher (left) gets assistance from Floyd Lee to add the Ball State flag to his dining hall. (Inset) Boucher gathers with schoolchildren in Erbil, Iraq. (Right) Miles Townsend and Mike Ogden display their Ball State pride during a recent meeting in Taji, Iraq.
President named among Indiana’s top influential women

Ball State President Jo Ann M. Gora has been named one of the most influential women in Indiana, according to the November 2007 issue of Indianapolis Business Journal. The publication’s editors selected 19 women from 120 nominations submitted by readers.

Gora was one of only two women in education to receive the honor. She was cited for Ball State’s Education Redefined strategic plan, which guides the university’s direction through 2012; for expanding Ball State’s educational offerings; and for transforming the university’s image and taking it to new levels of visibility.

Ball State’s president since August 2004, Gora is a member of the American Council on Education’s Committee on Leadership and Institutional Effectiveness and has served on the board of the National Association of State Universities and Land Grant Colleges.

She is on the executive committee of the Indianapolis Museum of Art and the Central Indiana Corporate Partnership, where she heads the governance committee. She also is a board member of the Indiana Chamber of Commerce, First Merchants Corporation, and Ball Memorial Hospital. She recently was named co-chairman of the Indiana Chamber’s Business-Higher Education Forum.

Shafer foundation gives $1 million to Ball State

Immersive learning experiences at Ball State will increase, thanks to a recent $1 million gift from the Phyllis and Hamer Shafer Foundation.

Immersive learning pairs interdisciplinary groups of students with a faculty mentor. Students drive the learning process as they examine a real-world problem and determine a real-world solution for it. Last year, immersive learning projects took student-faculty teams to communities throughout the state of Indiana.

The $1 million gift is the latest in a long history of philanthropy to Ball State for the Shafer family. The most visible symbol of their generosity is Shafer Tower, built in 2001.

The Shafer foundation recently was named one of the top business leaders just days before graduation.

Magazine positions undergrad program in 2007 top 20

Entrepreneur magazine and The Princeton Review ranked Ball State 20th in an analysis of the nation’s top undergraduate entrepreneurship programs.

The rankings were compiled for the magazine’s November issue by The Princeton Review, a multifaceted New York-based education corporation. Ball State’s program was ranked ahead of the University of Iowa, Brigham Young University, Baylor University, Northeastern University, and The Ohio State University.

Nine hundred schools were evaluated based on academic requirements, students and faculty, and outside-the-classroom support and experiences.

Ball State’s entrepreneurship program has consistently ranked in the top ten by U.S. News and World Report since 1999.

This is the third time in recent years that Entrepreneur magazine has ranked Ball State among the nation’s best. The magazine ranked the university’s undergraduate program among the top 25 in 2003 and 2004.

The entrepreneurship program is an initiative of Ball State’s Miller College of Business. It includes a final pass-or-fail class that requires seniors to put their degrees on the line when their business plans are reviewed by a group of top business leaders just days before graduation.

Ball State selected as first Apple training center in Indiana

The university has been selected as Indiana’s first Apple Authorized Training Center (AATC) and Apple Authorized Training Center for Education (AATCe), providing courses in digital media technologies using Apple software.

With the affiliation, Ball State joins a network of colleges, universities, and businesses throughout the nation, training individuals in digital media technologies.

AATC training for information technology professionals will be primarily at the Ball State Indianapolis Center, while AATCe courses for students are being conducted on campus.

The AATC and AATCe centers serve as a resource for training a broad range of users, including professional editors, students, faculty, business executives, digital artists, sound designers, filmmakers, webmasters, photographers, and other individuals interested in digital technology.

Upon completing the course material, individuals may become certified by taking an exam.

Ball State is providing assistance for the Apple training centers through the Digital Exchange Initiative, a $20 million project funded by Lilly Endowment Inc. to enhance the university’s innovative, immersive educational experiences for students in digital technology.
Ball State obtains grant for emergency personnel training

Ball State will receive a $2.5 million grant from the federal government to improve the communication skills of the nation’s 911 dispatchers and other emergency public communications personnel.

Over the next three years, Ball State will develop a comprehensive program to broaden the scope of public communications training to improve awareness, performance, management, and planning skills of essential communications personnel, including 911 dispatchers, on-scene incident commanders, and public information officers.

The project’s focus will tap into the expertise of Ball State faculty in the areas of communications, digital production, and emergency management.

Ball State’s team of faculty and staff was expected to begin working on the project by the end of 2007, and will create a communications DVD that will be distributed to about 3,000 911 dispatch offices for independent study awareness training. A comprehensive electronic independent study module also will be used in conjunction with on-site, hands-on training activities utilizing tabletop exercises and other techniques.

The team includes: Robert Pritchard, MA88; Robert Yadon; Nancy Carlson, MBA84; Greg Siering, PhD01; Phil Bremen, MA04; and William Gosnell, ’92BS01.

The grant is from the U.S. Department of Homeland Security through the Federal Emergency Management Agency (FEMA) and is part of a Competitive Training Grant.

Study names

Muncie nation’s most affordable town

A new study finds that Ball State’s cutting-edge academic programs, picturesque buildings, and tree-lined roads are located in the nation’s most affordable college town.

According to the third annual Coldwell Banker College Home Price Comparison Index (HPCI), Muncie is most affordable, up from third place last year, because a typical single-family home averages about $150,000.

The company defines the typical home as a single-family dwelling with 2,200 square feet, four bedrooms, two-and-a-half baths, family room, and two-car garage.

For the third straight year Palo Alto, CA, home to Stanford University, is the nation’s most expensive college town, where a similar home would cost about $1.7 million.

EFT program travels to Little Rock, Arkansas

The university’s award-winning Electronic Field Trip (EFT) program traveled to Central High School in Little Rock, AR, December 4, 2007 to commemorate the 50th anniversary of the Little Rock Nine.

Without ever leaving the classroom, more than 50,000 schoolchildren in grades 7-12 from 47 states and Washington, D.C., Australia, Canada, and Switzerland visited Little Rock Central High School National Historic Site and its visitor center. Sponsors of the trip were Ball State, the National Park Foundation, and Best Buy Children’s Foundation.

The broadcast, “Commemorating Courage: The Nine Who Made a Difference,” took students to Central High School and into the lives of the Little Rock Nine to learn about the struggles they endured while the country fought over desegregation. Students also had the opportunity to call in or e-mail questions to the show’s host and special guests.

The integration of nine African-American students into Central High School, which was previously an all-white school, stirred up controversy, drew national media attention, and was one of the first real tests of the Brown vs. Board of Education Supreme Court decision.

Spirit Trickey-Rowan, daughter of one of the Little Rock Nine and a park ranger, hosted the event while Ernest Green and Minnijean Brown-Trickey, members of the Little Rock Nine, made special guest appearances. Four students from local high schools in Little Rock, including Central High School, were on site to help with the EFT.

EFT also took part in a virtual field trip to Grand Teton National Park in October 2007. “Tails from the Tetons” helped children, many of whom live in densely populated cities, understand the importance of preserving the country’s vast natural resources.

Upcoming EFTs include “A Whale Story: A South Seas Adventure,” Tuesday, February 26, which will explore the migratory patterns and dangers faced by gray whales; and “Field of Colors: Flying Objects on the National Mall,” Tuesday, April 1, featuring the Smithsonian Kite Festival and exploring wind and weather.

Did you know?

Ball State has 915 full-time faculty members. Nearly 92 percent of all tenured and tenure-track faculty hold terminal degrees in their disciplines.
examines the markets that are home to 119 Football Bowl Subdivision (I-A) schools.

According to the study, while nearly $1.5 million separates the most affordable community (Muncie) from the most expensive (Palo Alto), both communities are benefiting from recently unveiled football stadiums. Ball State's Scheumann Stadium underwent a $13.7 million renovation. The one-year-old, state-of-the-art Stanford Stadium seats 50,000.

Oklahoma State University and the University of Toledo entered the list of the ten most affordable markets, while all ten of the most expensive college markets repeated from the 2006 list.

The Mid-American Conference again ranks as the most expensive league, with homes averaging $230,272 in its 12 markets. The Pacific Coast Conference tips the scales as the most expensive ($737,040).

High school group honors First Amendment advocate

The director of Ball State's First Amendment advocacy organization was recently honored by the Indiana High School Press Association (IHSPA).

J-IDEAS director Warren Watson received the Louis Ingelhart Friends of the Student Press Award from the IHSPA during its annual convention in Franklin in October 2007.

Nationally recognized as a champion for the freedom of college news media, Ingelhart was professor emeritus of journalism and director emeritus of student publications at Ball State. He died in January 2007.

The IHSPA annually honors people who contribute to scholastic journalism or the First Amendment in a spirit like that of Ingelhart, who himself received the honor in 1985.

Watson was named J-IDEAS director in 2004. He previously was a vice president at the American Press Institute (API) and a 26-year veteran of American newspapers.

Watson has held reporting, editing, art, and management positions at newspapers as small as the 2,000-circulation Somersworth-Berwick (MN) Free Press and as large as the 300,000-circulation St. Petersburg (FL) Times. He is a New Hampshire native, earning a bachelor's degree in history from the University of New Hampshire in 1973.

Established in 2003, J-IDEAS is designed to raise First Amendment appreciation, promote media literacy, and encourage student media in high schools. It is affiliated with Ball State's Department of Journalism and the College of Communication, Information, and Media.

CMD opens facility in New York City

Researchers from Ball State's Center for Media Design (CMD) will work closely with top partners in the communications industry as a result of an office in the heart of New York City.

CMD and Schematic, a full-service digital agency, have opened the Media Insight Center (MIC), a research and development facility for eye tracking and usability, in the company’s New York offices.

The center allows Ball State to have a presence in New York. The research office will also provide students with immersive learning opportunities in the coming years through a variety of research partnerships.

CMD is part of the $20 million Digital Exchange initiative funded by Lilly Endowment Inc.

At the Schematic-based center, researchers will use continually evolving and innovative eye-tracking and usability research methods for interfaces, devices, and content across platforms. The center is among the few facilities in the country equipped to conduct eye-tracking research in computer, television, and mobile settings.

The recently opened New York center, which features a family room and home office, is the third in a network of custom-designed naturalistic environments for desktop and television-based eye-tracking and usability research.

Winter graduation welcomes former head of NSF

Former National Science Foundation (NSF) head John Brooks Slaughter addressed Ball State’s new graduates during the university’s winter commencement ceremony in December.

A fellow of both the American Association for the Advancement of Science and the American Academy of Arts and Sciences, Slaughter served as director of the NSF from 1980 to 1982. He also is a former chancellor of the University of Maryland, College Park (1982-88), and president of Occidental College in Los Angeles (1988-99).

Slaughter was elected to the American Society for Engineering Education Hall of Fame in 1993 and to Eminent Member status in Eta Kappa Nu, the national honor society of electrical engineering, in 2001.

Slaughter was named Melbo Professor of Leadership in Education at the University of Southern California in 1999 and a year later, president and CEO of the National Action Council for Minorities in Engineering (NACME).

Approximately 1,200 students in doctoral (28), master’s (199), bachelor’s (845) and associate (141) programs received their degrees.

Ball State’s December ceremony marked the 151st Commencement ceremony.
**APPLICATION INSTRUCTIONS:**

- You must submit a separate validated application for **EACH** plate requested.

- The name on the application must be the same name listed on the vehicle registration. Vehicles may be registered or leased in the name of one or more owners, but one of the owners or lessees must be a member of the special authorized group.

- Special number requests CANNOT be accommodated.

- Fees: $25.00 (per year) payable to the Ball State Alumni Association and $15.00 (per year) for special recognition plates payable to the Bureau of Motor Vehicles at the time of registration in addition to the other annual registration fees (registration fees, excise taxes, applicable county and local taxes).

- Documentation of eligibility is subject to verification and review by the Bureau of Motor Vehicles. The following statement must be signed by the authorized organization representative.

**DO NOT SIGN INFORMATION BELOW.**

I verify that the applicant listed above is authorized to receive the group recognition plate indicated and has paid all fees as required by our organization.

Ball State’s Vision

“If we don’t get the toxins out of our water, if we don’t stop putting greenhouse gases into the atmosphere, we are not going to have that glorious future we could have had. We may actually drive ourselves into extinction.”

John Vann, green initiatives coordinator for Ball State’s Council On The Environment (COTE), predicts a grim future if the world doesn’t step up efforts to make the planet sustainable. He defines
sustainability as long-term human survival, with an acceptable quality of life, indefinitely into the future. The changing climate, clean air, clean water, natural resource abuse, and land use are all problems that need to be addressed to assure a sustainable world.

“If we don’t get the climate right, then these other things like fresh water, food, and land and water pollution are not going to matter,” Vann says.
Ball State is taking action. In December 2006, President Jo Ann Gora was among the founding signers of the Presidents Climate Commitment. The commitment joins Ball State with 300 universities nationwide in the fight against global warming, committing the university to work toward a carbon neutral campus. Concurrent with the president's efforts, the university's strategic plan for 2007-2012 contains a unit-level sustainability plan. Every department, deanship, vice-presidency, and administrative entity within the university structure has been charged with preparing a statement of its efforts to promote sustainability.

Robert Koester, chairman of COTE, notes, “We have this deeply rooted effort now to bring the entire institution further down the road. It's pretty substantial.”

For nearly two decades, Ball State has been engaged in making sustainability issues a priority, creating opportunities to raise awareness on campus and in the greater community. The first step toward formally recognizing concerns began in 1991 when the university, through the direction of then-Provost Warren Vander Hill, appointed the first Green Committee. Koester says the 14-member committee looked into ways of ensuring every student on campus would become more environmentally aware.

The committee made 35 recommendations and included provisions for summer training for faculty, Greening of the Campus conferences, and campus lectures. Many of the Green Committee's recommendations were put into action.

Ball State President John Worthen signed the Talloires Declaration in 1999, taking the university's environmental commitment to the next level. Thirty-one university leaders and environmental experts representing 15 nations wrote a global agreement, which originated in Talloires, France. The document is a guide for institutions to participate in sustainability efforts. Ball State became the first university in Indiana to sign the agreement.

In 2000, the university took formal action to implement the ten Talloires tenets. As a result, Vander Hill appointed the Green-2 Committee. It made 184 recommendations, including ten initiatives for how the university could honor its commitment. COTE also was established to oversee the progress of sustainability on campus.

Ball State's board of trustees furthered the university's commitment when it adopted a sustainability statement in 2003. The statement is a commitment to: “protect and enhance the environment through our learning, research, service, and administrative operations.” Five visions are outlined in the statement, to include reducing the consumption of materials and energy, establishing community programs, developing leadership and partnerships with other universities, providing academic opportunities, and providing educational opportunities to students, faculty, and staff.”

“President Gora is maintaining this kind of tradition we have going back to 1990. She’s expanding it and developing it further,” Koester says of Ball State’s recent commitment. “The provost is doing the same thing by working to get this into these plans.”

COTE coordinates environmental efforts, working across disciplinary lines and providing counsel and support to the university. The council meets once a month to anticipate, facilitate, and celebrate sustainability projects, according to Koester. COTE appointments are three-year terms, and membership is comprised of community members, graduate students, undergraduate students, and department representatives. Koester says diverse membership in COTE is a key ingredient.

“Leadership is critical to achieving any kind of direction, and certainly, in the face of the complexity of sustainability issues, you really need broad representation, you really need all the players at the table,” he says. Historically, COTE has provided vital input, which has resulted in measurable impact.

“Certainly, we were a resource when it came time for the strategic planning,” Koester adds. “We were
President Jo Ann Gora and Senator Richard Lugar stand with one of Ball State’s hybrid-electric buses. Ball State was the first public university to integrate hybrid-electric buses into its fleet.

The university’s vision includes reducing consumption of materials and energy and emission of pollutants to their lowest levels possible, without lowering the quality of Ball State’s education or services. The active implementation of LEED Certified buildings and alternative fuel and hybrid-electric vehicles in the university fleet are two visible representations of the university’s commitment to sustainability.

Park Hall and the David Letterman Communication and Media Building, opened in the fall of 2007, are the first LEED Certified buildings on campus. LEED Certification is the nationally accepted benchmark for the design, construction, and operation of green buildings. For a building to be LEED Certified, it must achieve goals such as reducing the amount of waste sent to landfills, conserving energy and water, being healthier and safer for occupants, and reducing harmful greenhouse gas emissions, according to the US Green Building Council.

“[LEED Certified buildings] create a work environment that is stimulating and comfortable,” Kevin Kenyon, associate vice president for Facilities Planning and Management, says. “Those are [some of] the main elements of a LEED building.”

President Jo Ann Gora and Senator Richard Lugar stand with one of Ball State’s hybrid-electric buses. Ball State was the first public university to integrate hybrid-electric buses into its fleet.
Wetlands in Indiana’s Pokagon State Park improve water quality, a key factor affecting sustainability.

According to Kenyon, much of the certification of a LEED building has to do with both visible and less visible features, such as use of natural lighting and use of locally produced materials. In addition to LEED Certified buildings, the university has implemented the use of a soybean-based fuel in Ball State’s fleet. Sue Weller, director of Facilities Business Services and Transportation, says the university started using biodiesel fuel in 2003, and was the first public university in the state to do so. Currently, the fleet maintains as many as 90 hybrid vehicles, which have proven to be valuable assets. All new vehicles must be E85 compatible.

The fleet also includes six hybrid-electric buses. The buses run on a combination of electricity and biodiesel fuel. Weller says the hybrid cars and hybrid-electric buses have helped keep the campus cleaner and quieter.

“[If you walk through campus you’ll notice that the black smoke and the [exhaust] smell are not there;]” Weller says. “The noise isn’t there, and that is attributed to the hybrid-electric.”

As it actively works for an environmentally friendly campus, Ball State also seeks to have an impact on its surrounding community. Steve Anderson, chairman emeritus of First Merchants Bank Corporation in Muncie and community representative to COTE, explains how COTE, particularly, is spurring awareness.

“COTE is lifting a level of awareness on environmental and sustainability issues within the university, with university people,” Anderson says. “As these people move into community roles, they are making an impact.

“A group of people who are primarily connected with the university organized the first sustainable living fair in the history of this area last summer,” he continues. “University personnel provided the leadership for that. This was absolutely a groundbreaking, precedent-breaking event.”

The Living Lightly Fair took place at the Delaware County Fairgrounds last summer. The fair included children’s activities, vendors, speakers, and musicians, all celebrating and promoting sustainability in East Central Indiana. The fair brought together more than 1,100 visitors and planning for next year’s fair is already underway.

Barb Stedman, director of National and International Scholarships and Living Lightly Fair co-founder, explains. “We’re trying to give people practical, creative, and inspiring ideas for using natural resources in a way that meets our generation’s needs, but also considers the needs of future generations,” she says. “What good is there in living luxurious lives now if it means our great-great grandchildren can’t live healthy, comfortable, and happy lives?”

The university educates the public on environmental and sustainability issues on a much larger scale during internationally recognized Greening of the Campus conferences. The biennial conferences bring representatives from universities throughout the nation and abroad to present and discuss current related issues. The most recent Greening of the Campus was hosted in September 2007. It attracted almost 400 individuals representing 132 institutions.

Koester notes, “That was a really successful event. In fact, so many universities, including those in foreign countries, came. “It reflects well on the institution. It’s a good sign of the kind of reputation we have.”

Ball State’s environmental awareness campaign expands beyond conferences, committees, and recommendations. The university actively equips its students with the necessary knowledge through its curriculum and immersion learning opportunities.
One example is clustered minors in environmentally sustainable practices. Established in 1997, the minors begin with three core sustainability courses. Students continue with courses that are in their discipline-related area, then complete a capstone course that relates to creating a sustainable future.

The clustered minors open opportunities for immersion learning. Last spring a group of students from a capstone course, Creating a Sustainable Future, established a plan for community gardens in a downtown Muncie neighborhood. Part of their plan included organizing a festival. The group distributed and offered organic foods as snacks. The idea was to encourage residents to create community gardens, grow organic foods, and eat nutritionally.

East Central Indiana is benefiting through Ball State’s Business Fellows program. Students are working locally on three sustainability projects during the 2007-08 school year, creating a greening guide for Westfield Washington School Corporation, helping the Muncie Unitarian Church reach “Green Sanctuary Status,” and producing a documentary about a logjam in the White River.

Ball State’s curriculum and programs allow faculty and students to learn and collaborate on sustainability issues, two more parts of the university’s vision.

The final point in Ball State’s sustainability statement is that all students, faculty, and university employees have opportunities to become aware of environmental concerns. Education is the key to empowerment for a sustained quality of life, Anderson says.

“The way we attack the challenges, the carbon emissions, the climate changes, is going to be what the most important goal of COTE in the long run will not be encouraging people to recycle waste paper, but will be to equip our university’s students to carry the message and do the right thing for the environment for the rest of their lives,” Anderson stresses. “I would say that the most important goal of COTE in the long run will not be encouraging people to recycle waste paper, but will be to equip our university’s students to carry the message and do the right thing for the environment for the rest of their lives.”

Koester agrees. “We try to find ways to ensure that students graduate with an understanding of environmental issues and feel empowered to take action once they become citizens in the working world.”

The result is a ripple effect, which includes, in large part, the students who attend Ball State, who participate in COTE, clustered minors, or related immersion learning experiences, and who graduate and apply the knowledge they gain at the university to making a positive difference in their world.

Business Fellows program takes sustainability efforts into community

by Sarah Davison

During the 2007-08 school year, ten Ball State students are helping produce sustainability plans for parts of the surrounding community. The efforts, facilitated by the Business Fellows program, focus on creating tangible plans that will lead toward preservation of resources.

Several students from various departments are working with the Westfield Washington School Corporation to create a greener master plan the school can put into practice. After the group concludes its work, the school corporation plans to publish a manual for other schools to use to help transition to sustainable practices.

“We want this to be something that goes beyond one school,” says James Eflin, chairman of the Department of Natural Resources and advisor to the project.

In another project, students are working with Muncie’s First Unitarian Universalist Church, seeking “green sanctuary status.” Becoming sustainable as a church falls directly in line with the Unitarian faith of being stewards of the environment, Eflin says. But the church also wants to take the Business Fellows students’ recommendations and distribute them to other churches in the area and state.

Other students are working to remove a logjam in Muncie’s White River. Eflin says Delaware County’s commissioners want the jam eliminated because it causes downstream pollution, filtration problems, and is a general eyesore to the community. The end result will be a documentary the Department of Telecommunications plans to distribute to other communities that struggle with the same issue.

The trio of proposals aims to not only serve the community, but also to create sustainability procedures that can be reused across the country.

“These are sustainability efforts at different levels,” Eflin says. “And that’s at the heart and soul of the course.”

Ball State Alumnus / January 2008   23
Billy Taylor merges wealth of experience with Ball State Men's Basketball program

by Danya L. Pysh

In 1995 Billy Taylor graduated from Notre Dame with a degree in accounting. He acquired an accountant position with Arthur Andersen soon after. Although he worked there for three years, that was not to remain his vocation.

“I thought that was going to be my professional track, in public accounting or in the accounting field,” Ball State’s head men’s basketball coach says. “But, once I realized that basketball was my passion, life became easier because I didn’t have to devote my energy to both my job and basketball.”

Taylor says one of the reasons for leaving the business world was what he found to be the lack of opportunity for mentoring others.

“You don’t have as many opportunities in the business world to [mentor], so the opportunity to get into coaching, I thought, was a great chance to impact the lives of young people. I really found a lot of value in that,” he says.

Academically and athletically successful in his own right, Taylor was valedictorian and a star basketball player at West Aurora High School in Aurora, Illinois. He credits his high school coach, Gordon Kerkman, as a tremendous mentor and teacher who helped influence Taylor as he developed his own coaching skills.

After high school, Taylor played basketball for Notre Dame, from 1991-95, serving as team captain his senior year.

When he decided to change career paths, Taylor was hired by his former Notre Dame coach, John MacLeod, as an assistant coach. He coordinated opponent scouting reports, game preparations, and both preseason and postseason skill development sessions.

“It was a great experience. Coach MacLeod is a class act, a gentleman, a teacher,” Taylor says. “He really cares about the student-athletes. [He showed me] how you can have a significant impact on someone’s life.”

In 1999, Taylor moved to UNC-Greensboro, where he worked as top assistant coach to Fran McCaffery.

His passion for basketball and coaching are not far removed from Taylor’s roots.

“My dad played at Northern Illinois University, and he also played semi-pro ball with a traveling team called Marathon Oil. So I grew up around the game and started playing at a young age. It has pretty much been a lifelong experience for me,” Taylor explains.

“Once I realized that basketball was my passion, life became easier because I didn’t have to devote my energy to both my job and basketball.”

—Billy Taylor
“[McCaffrey] has been a tremendous mentor and friend to me and has a great basketball mind,” Taylor says.

A former head coach at Lehigh University, McCaffery was instrumental in helping Taylor secure the head coaching position there in 2002. Under Taylor’s guidance, the Lehigh Mountain Hawks reached the NCAA tournament in 2004. In the opening round game, they played Florida A&M.

Though they had a disappointing loss, Taylor says making it to the NCAA “big dance” has been a high point in his career. “To be able to go to the tournament was a great feeling,” Taylor says. “To be league champions and winning the league championship was just awesome.”

After five years at Lehigh, Taylor was ready to return to the Midwest. Ball State was the perfect fit for a number of reasons, he says. “The proud history and tradition here of Ball State basketball, the coaches, and the players, excited me. Indiana is a great basketball state in terms of recruiting, and getting an opportunity to recruit some very talented young men was also very exciting to me,” explains Taylor, continuing that being near to family again was an added bonus.

“It was important, if we were going to leave a place where we felt very comfortable and really felt a lot of support and love, we wanted to come somewhere where we could [continue to] feel that. And here we get that from a family standpoint, and also a working standpoint.”

Describing strengths of this year’s Cardinal team, Taylor points to outstanding talent, including upperclassmen Peyton Stovall and Laron Frazier, and freshmen Deontay Twyman and Melvin Goins. “We have a talented basketball team,” Taylor says. “Our kids are resilient, and can respond to adversity.”

With a tough schedule at the start of the 2007-08 season, including contests against Butler, Georgetown, St. Joseph’s, and Purdue, Taylor refers to the first games of the season as great learning experiences.

“When there’s a lot on the line, you can see how your kids can respond, and that’s when you can really start to tell what type of team you have. I certainly learn a lot about our guys that way,” he says.

The Cardinals will begin their Mid-American Conference play at Toledo, Sunday, January 6. Their first conference home game is against Central Michigan the following week. “If the team can take care of the basketball, execute our offense, and get a good shot, the results will be there,” Taylor says.

Taylor remains optimistic about this season’s potential and says he hopes his experience and talents will combine with Ball State’s legacy to create an environment for the players that fosters success, both on and off the court. Taylor emphasizes that it’s great to have an opportunity to coach at a place like Ball State, where student-athletes have a strong alumni base.

“There are a lot of people who have Ball State degrees and are doing meaningful things with their lives, making an impact, giving back, having success in business,” he says. “I am proud and thankful to be the coach here, and hopefully can help other young men graduate and be successful alumni of this university.”

* Conference Games
Football players recognized by major media

Chris Miller (Libertyville, IL/Carmel H.S.), a junior punter on the Ball State football team, has been named to the American Football Coaches Association (AFCA) All-America Team while junior Darius Hill (Blue Springs, MO/Blue Springs H.S.) has been named one of eight semifinalists for the John Mackey Award.

The Cardinals also had nine student-athletes named to the All-MAC teams, which are selected by the league’s 13 head coaches.

Four Ball State juniors: Robert Brewster (Cincinnati, OH/Wyoming H.S.), Dante Love (Cincinnati, OH/Withrow H.S.), Hill, and Miller were named to the All-MAC First Team.

Ball State placed three student-athletes: Nate Davis (Bellaire, OH/Bellaire H.S.), Bryant Haines (Piqua, OH/Piqua H.S.), and B.J. Hill (Lanham, MD/Riverdale Baptist H.S.), on the All-MAC Second Team.

Also, two sophomores, Brandon Crawford (Fort Wayne/South H.S.) and Alex Knipp (Amherst, OH/Steele H.S.), were named to the All-MAC Third Team.

Miller, who was named to the Playboy Preseason All-America Team in June 2007, became only the sixth football player in Ball State history to be named to an All-America First Team. He is the only player from the MAC named to the 25-person AFCA All-America Team.

Miller punted 56 times during the season for 2,566 yards. His 45.8 average ranks third in the nation. Miller placed 22 of his 56 punts inside the opponent’s 20-yard line, while six punts were fair catches and not returned by the opponents.

A finalist for this year’s Ray Guy Award, awarded to the nation’s top collegiate punter, Miller was named to the 2006 Sporting News All-America Second Team and received honorable mention on the 2006 SI.com All-America Team.

Hill has 56 catches for 837 yards and nine touchdowns this season. He has 22 career receiving touchdowns, which ties for second on Ball State’s all-time list.

Hill tallied ten touchdown receptions in 2006, tying the Ball State single-season mark. Hill was one of 32 on the Mackey Award Watch List all season.

Receiving honorable mention on the 2006 All-MAC Team, Hill played in all 12 games in 2006. He was recognized by Sports Illustrated’s Stewart Mandel as the “Best Player You Have Never Heard Of,” and received honorable mention on the SI.com team last season.

Brewster, a junior offensive lineman for the Cardinals, started all 12 games as right tackle. He was part of an offensive line that protected quarterback Davis and allowed him to set a Ball State single-season record with 27 touchdown passes and 3,376 passing yards.

Brewster was part of a unit that blocked for more than 1,700 rushing yards combined by Ball State’s offense.

Love, who ranks seventh in the nation in all-purpose yards with 197.08 per game, leads the Cardinals with 87 catches for 1,229 yards, and is tied for team-high honors with nine touchdown receptions.

Love ranks ninth in the nation in receiving yards per game with a 102.42 average and is tied for ninth in the country with 7.25 catches per contest.

Davis started all 12 games as quarterback for the Cardinals and threw for a school record 3,376 yards, shattering the previous mark of 3,277 set by Neil Britt, ’86, in 1983.

In addition, Davis attempted a school record 429 passes and completed a BSU all-time best 245. He threw a school record 27 touchdown passes, while throwing only six interceptions on the season.

Haines, who started all 12 games as linebacker for the Cardinals, leads Ball State with 122 tackles (65 solo, 57 assists). He also has nine tackles for loss, one sack, one interception, and one fumble recovery. He ranks 29th in the country in tackles per game.

Crawford, a 31-year-old former Marine, started all 12 games as defensive end for Ball State. He ranked sixth on the team in total tackles with 59 and led the Cardinals with 17 tackles for loss and eight sacks. Crawford is tied for 22nd in the nation in tackles for loss.

Knipp started nine games and played in all 12 contests for Ball State. The defensive back registered 75 tackles, which ranked third for the Cardinals, tallying two tackles for loss, four interceptions, and two pass breakups.
Men’s, women’s basketball slated for 20 TV Games

Ball State Athletics, in exclusive cooperation with the Ball State Sports Network (BSSN) and WIPB-TV, has announced a 13-game television package for Ball State men’s and women’s basketball. The network will produce ten men’s games and three women’s games.

The 2007-08 Ball State Sports Network package will include affiliates WIPB (Muncie), WNDY (Indianapolis), MY-TV (Fort Wayne), WYIN (Merrillville), WJTS (Jasper), Indiana 9 (Jeffersonville), and HTV-19 (Noblesville).

The BSSN also will produce and air The Billy Taylor Show, featuring ten episodes of the weekly coach’s show beginning Tuesday, January 8. Wil Hampton will return as host of the show.

In addition, the games and The Billy Taylor Show will be streamed as part of Ball State “All-Access” online at www.ballstatesports.com.

Cards place two on Academic All-MAC Field Hockey Team

Ball State senior defender Nicole Humphreys (Sinking Spring, PA/Wilson H.S.) and sophomore forward Brooke MacGillivary (North Vancouver, B.C./Carson Graham H.S.) have been selected to the Academic All-Mid-American Conference Field Hockey Team.

Humphreys is an elementary education major who has a 3.78 grade-point average. Over her four-year collegiate career, Humphreys started 73 of a possible 74 games, including all 18 as a senior in 2007. She was a key member of Ball State’s defensive unit and finished second in the conference in defensive saves this season with four.

MacGillivary owns a 3.73 GPA as an exercise science major. The sophomore finished second in the MAC in 2007 with 15 goals and 33 points. She logged four multiple-goal games. MacGillivary, who recorded three game-winning goals on the season, was rewarded for her efforts three times as the MAC Offensive Player of the Week.

For a complete schedule of televised men’s and women’s basketball games, visit www.ballstatesports.com.

BSU football plays Rutgers in International Bowl in Toronto

Ball State head coach Brady Hoke, ‘82, is leading his alma mater to the International Bowl, Saturday, January 5, in Toronto, Canada.

The Cardinals will play the 7-5 Rutgers Scarlet Knights in the Rogers Centre, formerly the Sky Dome. The game will be played at noon (EST) and televised live on ESPN2.

After finishing their regular season, also with a 7-5 overall record, the Cardinals shared the Mid-American Conference West Division Championship. The 2007 season is Ball State’s first seven-win season since 1996, when the Cardinals won the MAC Championship and played in the Las Vegas Bowl. The Cardinals also made bowl appearances in 1965, 1967, 1989, and 1993.

The Ball State Alumni Association organized travel for Cardinal fans to the International Bowl, along with a pre-game outing at Windows, a three-tiered banquet facility offering an open-air view of Rogers Centre’s playing field to watch the Cardinals warm-up.

Aft er finishing their regular season, also with a 7-5 overall record, the Cardinals shared the Mid-American Conference West Division Championship. In addition, the games and The Billy Taylor Show will be streamed as part of Ball State “All-Access” online at www.ballstatesports.com.

The Mid-American Conference office also announced a 59-game men’s and women’s league television package. Ball State men’s basketball will have four confirmed games, three on Comcast Local and one on ESPN Full Court, as part of the league’s package. The BSU women’s team is slated for three games, two on Comcast Local and one on Fox Sports Net, through the MAC package.

Ball State Alumni / January 2008 27
Stovall, DeMuth receive nominations for character

Senior Julie DeMuth (Merrillville/Merrillville H.S.) and senior Peyton Stovall (Lafayette/Lafayette Jeff H.S.) have been named candidates for the 2007-08 Lowe’s Senior Celebrating Loyalty and Achievement for Staying in School (CLASS) Award. The award honors the nation’s top 30 senior male and female college basketball players.

The award, presented annually to the NCAA Division I Student-Athlete of the Year in eight sports, focuses on the “Four Cs” of classroom, character, community, and competition. Lowe’s will honor the winners with trophies during the NCAA Final Four.

DeMuth and Stovall are the only student-athletes from the Mid-American Conference named as candidates, while Ball State joins Tennessee, Texas A&M, and the United States Military Academy as the only schools with both a male and female candidate. The two also are the first in either sport in Ball State history to be among the top 30 candidates.

DeMuth, who last season became the 18th BSU women’s basketball player to reach 1,000 career points, currently leads the 2007-08 Cardinals with her 14.7 points and 7.4 rebounds per contest.

Stovall scored a season-high 22 points vs. Evansville in November 2007, and has 51 career double-figure scoring games to his credit.

Soccer claims second MAC title

For the second-straight season, the Ball State soccer team claimed the Mid-American Conference regular season title as the Cardinals knocked off archrival Miami, 2-1, in overtime, in November 2007. The Cardinals became the first team in MAC history to win back-to-back MAC titles outright.

Finishing the regular season with a 12-5-1 overall record and a 9-1-1 MAC record, the Cardinals recorded their second title in program history. Ball State’s nine conference wins are tied for a program record, and the team now has won a MAC-best 25 conference games over the past three seasons.

The Cardinals earned the number-one seed in the MAC Tournament for the second-straight season with the win. Reaching the MAC Tournament semifinals, the team fell to fourth-seed Bowling Green, 3-0.
What CARD does for you:

✓ It is your free ID for University Libraries.
✓ It also serves as your ID for use of Ball State’s recreational facilities. (A $150 annual fee is required by the Office of Recreation Services.)
✓ CARD can be used as your discount card at the local merchants listed.

Home-grown talent
by Sarah M. Davison

There’s something fun about being first to know things,” says news anchor Heather Herron, ’94. Herron has reported for WANE-TV in Fort Wayne for the past five years, co-hosting the station’s evening newscasts.

Herron’s career in broadcast journalism has included numerous highlights, among them, a trip to Thailand to cover Operation Smile, a project that sent plastic surgeons into under-developed countries to assist children born with deformities.

“The children are pretty much shunned from their communities,” says Herron, who had the opportunity to witness and share life-changing experiences through her reports.

Herron credits much of her firm foundation in telecommunications to her education at Ball State.

“Once I got into the TCOM program, I was hooked,” Herron says. “I was setting up my career while I was there.”

She praises Ball State’s advanced technology as placing her, “well ahead of where I needed to be.”

Herron says Ball State didn’t shy away from dispelling the idea that all media jobs are full of glitz and glamour. “The TCOM program did an excellent job of telling it like it is,” says Herron, who worked for years in radio and behind the scenes before appearing on camera. “The majority of professors have been in the business before. They were very realistic about the expectations, so I didn’t have any illusions.”

Herron, who grew up in Gaston, says Ball State was “right in my own backyard.”

Heather Herron is a news anchor in Fort Wayne.

Lapping the competition

by Jacob M. Laskowski

After she graduated with a degree in English and fine arts, Josephine Fox, ’62, pursued her master’s degree in art education from Marquette University. She met her husband Geoff while in graduate school. The couple moved to California, where Geoff began teaching physics at the University of Santa Clara.

In 1974, Geoff started a small distribution company for European motocross bikes. Originally based in Campbell, CA, Fox Racing soon became a hot selling item in both Europe and the United States.

The company started its own professional motocross team in America and began finishing in top spots in several races, proving to American racers that Fox Racing’s gear was “the best that money could buy.”

Josephine Fox is a co-founder of Fox Racing Corporation. Josie Fox is the founder of the Foxes at the time, their handmade gear and clothing worn by the team’s members became a hot selling item for not just racers, but fans of the sport as well.

Over the last three decades, Fox Racing has become an international leader in the sportswear apparel industry with its famous Fox Head logo seen worldwide.

Geoff, Josie, and their four children all work at the company, now based in Morgan Hill, CA.

Jon Kizer, ’88, Carmel, is the founder and president of Direct Path Alliance, a consulting firm in Indianapolis.

Constance E. McIntosh, ’89, Muncie, has been appointed to the Indiana State Board of Nursing. She is past president of Ball State’s Nursing Alumni Society board of directors.
