EDUCATIONAL SERVICES

Center for Medical Education

Persons interested in the study of medicine must submit an application for admission directly to the Admissions Office, Indiana University School of Medicine, Indianapolis, IN 46202. All candidates accepted may indicate where they prefer to begin their medical education. Final assignment of students to the Muncie center (known formally as the Indiana University School of Medicine-Muncie) will be made through the admissions office of the Indiana University School of Medicine. Medical students so assigned then will be registered at Ball State University as special graduate students.

The curriculum of the Indiana University School of Medicine is built around nine competencies, of which clinical skills and the information base of medicine are two. Students must master all nine competencies at level one before entering the third year of study, and must master them at level two to graduate; three competencies must be mastered at level three.

The first year of study consists of the basic science courses, which are taught as blocks; each block focuses upon only a single discipline. The first year medical school blocks are histology; gross anatomy; neuroscience; biochemistry and molecular biology; physiology; and microbiology and immunology. One morning per week is devoted to the doctor–patient relationship. Some classes also include clinical correlation sessions taught by local physicians. Year two follows a more traditional schedule and is composed of introduction to clinical medicine; general and systemic pathology; medical genetics; biostatistics; and pharmacology. Second-year students also participate in autopsy review sessions and have clinical experiences available to them through physician shadowing. Summer externship experiences at Ball Memorial Hospital are available for interested students.

A medical student taking graduate-level basic medical science courses toward a degree in medicine from Indiana University can at the same time earn a master’s degree from Ball State University in another subject. Interested students must file a graduate application in the Ball State Graduate School and meet regular admission requirements (see pages 9-10).

After completing the second year curriculum, medical students proceed to the Medical Center at Indianapolis for the third year. There are several offerings at Ball Memorial Hospital in the elective portion of the final year of the medical program. The medical curriculum uses the resources of a number of departments. The courses specifically designed for medical students are listed under the Center for Medical Education as well as under the appropriate departments.

Computing Services

The university has completed a secure broadband wireless network that provides Internet access to students, faculty, and staff. Fiber optic voice, data, and visual networks link classrooms, laboratories, residence halls, and offices across campus. University Computing Services operates 15 general-purpose computer labs, including an adaptive technology lab, two computer-based testing labs, two high-end graphics labs, and one 24-hour computer lab facility. In addition, more than 50 departmental labs are equipped to assist students in their academic endeavors. For more information, visit the University Computing Services Web site at www.bsu.edu/ucs or its office in RB 237, or call 765-285-8111.

Digital Data Services

Digital Data Services provides Ball State faculty and staff with digital output of traditional media sources. This service provides an entry-level point of departure into the use of technology in the classroom and in the systems that support classroom activities. We take physical documents and convert them to digital form, provide academic evaluation and research support through the use of an optical scanner, and provide assistance in configuring media for use on the world-wide Web. For more information, visit www.bsu.edu/ucs/scanning.

University Teleplex
The Teleplex encompasses campus technology support for teaching and serves graduate students both on-campus and off-campus in a variety of ways. The Teleplex produces and televises courses throughout the state of Indiana, making it possible for graduate students to take Ball State courses at off-campus sites. On-campus graduate students have access to equipment for production through the Media Lab, 765-285-5373, and may use audiovisual equipment in the classroom (to do so, contact Equipment and Projectionists Services (EPS) at 765-285-5337.

Through departmental chairpersons, graduate students with assigned teaching responsibilities have access to the Teleplex, multimedia development, and delivery support. For more information on the multimedia development services, call Teleplex Production at 765-285-1898. To schedule multimedia delivery services, call Video Information Services (VIS) at 765-285-9136.

RESEARCH FACILITIES

University Libraries
The mission of the Ball State University Libraries is to serve users by providing access to resources intended to satisfy informational needs related to and consistent with the university’s teaching curriculum, research mission, and service programs.

The University Libraries, comprised of the Alexander M. Bracken Library and the Architecture and Science-Health Science branch libraries, offer convenient access to more than 1.5 million books, periodicals, digital resources, media, microforms, software, government publications, maps, manuscripts, music scores, archival records, and electronic databases.

Bracken Library, the main library on campus, is open more than 120 hours weekly during academic semesters. The library’s arrangement into separate service, collection, and study areas facilitate access to information sources. Library personnel are available in each service area to assist library users.

CardCat, the Ball State University Libraries’ Web-based catalog of resources, is accessible via the Libraries’ home page at [www.bsu.edu/library](http://www.bsu.edu/library). The home page also provides access to indexes of journal articles including full-text databases, connections to Internet browsers, course reserves, online tutorials, and library information. Assistance finding and using these resources is available at the Reference Desk, Bracken Library, First Floor West, 765-285-1101, or via e-mail and live chat. Extended individual help, featuring one-on-one appointments with research librarians, is also available. Technology Training Support Services offers free workshops, available to graduate assistants, on a variety of software applications.

Digital equipment, including laptops, data projectors, video cameras, are available for use from Educational Resources. Wireless connectivity is available throughout, and Bracken Library hosts the Bookmark Café, featuring hot and cold beverages and light snacks. Group study rooms are available for use and may be reserved online.

A limited number of scholar carrels are available for use by graduate students in Bracken Library. Applications are available online at the Libraries’ web site. Preference is given to full-time doctoral candidates working on their dissertations.

Sponsored Programs Office
The Sponsored Programs Office (SPO) at Ball State University is responsible for assisting faculty, staff, and students in their pursuit of grant funding for research, scholarly, creative, or other projects. SPO services include assistance in identifying potential funding opportunities; guidance (together with a student’s faculty mentor) in developing proposal components; oversight in securing university internal approvals and in interacting with the Research Compliance Office; and in submitting proposals to sponsors.

In addition, SPO coordinates ASPiRE, an internal grants program. The ASPiRE program funds supplies and expenses associated with research or creative projects and also supports travel to professional meetings for presentation of project results or for performance of creative works. An annual
campus Student Symposium offers students the opportunity to present their research or creative projects in poster sessions or displays to campus constituents. Graduate students are invited to visit the Sponsored Programs Office and to explore its programs and services at [www.bsu.edu/research](http://www.bsu.edu/research).

**Applied Research Institute**

The Applied Research Institute, operated by the Center for Information and Communication Sciences, supports applied research endeavors on information and communication issues. Research projects, many of which are cross-disciplinary, are conducted within the institute and in conjunction with the center’s faculty, graduate students, affiliated programs, and industry.

The institute manages the four laboratories in the center featuring state-of-the-art information and communication systems devoted respectively to voice, data, video and imaging, and wireless applications. The institute also oversees research projects based on campus, at various locations throughout the state of Indiana, the nation, and other countries. Students in the center’s Master of Science in Information and Communication Sciences program use the laboratories and projects extensively in their professional preparation.

Faculty and graduate students from any discipline are invited to explore mutual research interests in this field with the director of the Applied Research Institute, Robert Yadon, or the center’s director, Steve Jones, Room 221, Ball Communication Building.

**Human Performance Laboratory**

The Human Performance Laboratory (HPL) at Ball State University was founded in 1965 and has a long history of applied exercise physiology research and training graduate students at the master and doctoral level. The HPL has been involved in a variety of applied research topics since its inception including carbohydrate metabolism, heat stress, fluid balance, over-training and tapering in athletes. This applied approach continues today with the focus on limits of human performance and clinical investigations of aging, space flight, bed rest, children, and metabolic health to name a few.

The research conducted in the HPL focuses on the positive aspects of exercise as applied to sports performance and various clinical conditions of human health. The majority of the research has been supported by external funding sources (National Institutes of Health (NIH), National Aeronautics and Space Administration (NASA) and private agencies). These funded projects have resulted in more than 500 scientific publications.

The graduate program includes master’s degrees in exercise physiology and clinical exercise physiology, and a PhD program in Human Bioenergetics that allows students to focus on an area of specialization that suits their interest and abilities. The training the students receive ranges from applied exercise physiology of human performance to basic physiology/biology and includes clinical aspects of exercise physiology. Thus, students get exposed to a broad range of fundamental aspects of human exercise physiology. This includes hands-on experience for all phases of the research while working closely with faculty and other graduate students to accomplish the goals of the laboratory.

Approximately half of the students who enter our program choose to concentrate the clinical exercise physiology program. This program involves working with a community based adult physical fitness program, laboratory testing and research, and cardiac, pulmonary, and oncology rehabilitation programs at Ball Memorial Hospital. The other half of the students who choose to focus their efforts on research may work with established investigators on grant projects.

The following advanced degrees are available: MA or MS in clinical exercise physiology, a MS in exercise physiology and a PhD in human bioenergetics.

**Neuropsychology Laboratory**

The Neuropsychology Laboratory was established in 1984 as a research, teaching, and clinically facility of the Department of Educational Psychology. The laboratory serves the larger community as a clinic: assessing, diagnosis, and remedial planning for, adults and children with potential neurologic disorders. Research consists of understanding brain mechanisms responsible for simple and complex patterns of
sensory motor and intellectual functioning. This includes memory, emotional, cognitive disorders, and various childhood illnesses.

The Neuropsychology Laboratory provides support for neuropsychology courses offered through the Department of Educational Psychology’s specialization training in neuropsychology. The laboratory is also a site for internships in the school psychology doctoral program. This training takes the form of service to the community—staff members see patients referred by patients, medical practitioners, public schools, and other agencies.

Raymond S. Dean, ABPP, FACPN, George and Frances Ball Distinguished Professor of Neuropsychology, is director of the Neuropsychology Laboratory at Teachers College, Rooms 903–905, 765-285-2289.

Outdoor Laboratories
The Ball State University Field Station and Center for Environmental Education (FSEEC) collectively manages the five field areas known as Christy Woods, the Cooper/Skinner Field Area, Ginn Woods, Hults Environmental Learning Center, and the Donald E. Miller Wildlife Area. Collectively, these outdoor laboratories include most habitat types found in East Central Indiana and provide excellent opportunities for the study of ecosystem processes.

Christy Woods, in the western part of campus, is an 18-acre tract that includes a forest, native plant gardens, and greenhouse facilities. Ginn Woods, a 160-acre nature preserve in northern Delaware County, is the only old-growth forest of comparable size left in East Central Indiana and the second largest old-growth forest in Indiana. As such, it has exceptional value as an educational resource and a research forest.

The Hults Environmental Learning Center, near Albany, Indiana, serves as an outdoor classroom and research facility. Most projects on this property deal with sustainable land-use and energy. The Miller Wildlife Area is a 16-acre parcel within the city limits of Muncie, that contains a flood-plain forest and a remnant oxbow of the White River. The Cooper/Skinner Field Area is a 130-plus acre property that contains forest, prairie, and wetlands. This property is used extensively for educational and research purposes and features a straw-bale building powered by a wind turbine and photovoltaic panels.

Ball State Weather Station
The Ball State University Weather Station, operated by the Department of Geography, consists of an onsite meteorological station, a National Oceanic and Atmospheric Administrator (NOAA) Cooperative Climate Substation, and a meteorology library. The Ball State Weather Station provides students with education and training experiences in the area of weather data collection and analysis.

Primary operations of the weather station include the recording of weather observations, compiling and summarizing weather data, communicating severe weather information to the public, and providing short- and long-range weather forecasts. Data collected and archived by the weather station are used for reference by business and local government and for research purposes by both students and faculty.

Public Health Entomology Laboratory
The Ball State Public Health Entomology Laboratory (PHEL) comprises two research laboratories (rooms CP 148 and CP149), a small library, and offices of the director Robert Pinger (room CP 189), in the Cooper Science Building. Administered under the Department of Physiology and Health Science, the laboratory is equipped for studying insects and other arthropods affecting public health. The laboratory is known in Indiana and the northcentral United States for its past accomplishments in mosquito research and its current research on ticks and tick-borne diseases.

The PHEL provides opportunities for graduate students to participate in established research programs and to pursue research projects of their own design. Laboratory operations are supported by internal and external funding. Visit the PHEL Web site at www.bsu.edu/physiology-health/entomology_lab.
STUDENT SERVICES

Alumni Association
The Ball State University Alumni Association provides services and administers events for alumni and the university. The Alumni Association attempts to acquaint alumni with the university’s ideals and objectives and assists in developing and maintaining life-long relationships. The Ball State Alumni Association is “to be an advocate for alumni, to enrich their lives, and to involve them with Ball State University.” It is governed by the Alumni Council, which consists of volunteer representatives from the alumni population. All representatives and officers are nominated and elected.

There is no annual fee to join, but alumni who contribute to the university, via the Ball State University Foundation, become active members of the Alumni Association. All alumni households receive The Ball State Alumnus, the association’s official publication. Alumni are also eligible to utilize the many services provided by the association, which offers Ball State affinity license plates, career assistance, insurance programs, Cardinal Alumni Retail Discount (CARD), affinity credit cards, Cardinal Corner, Inc., and scholarship opportunities. To learn more, go to www.bsu.edu/alumni.

Arts, Entertainment, and Recreation
The John R. Emens College-Community Auditorium hosts major symphonies, Broadway plays, ballets, and a variety of other events. The Muncie Symphony Orchestra presents an annual series of concerts available to students, faculty, and community. In addition to the dramatic and musical productions presented by the annual Artist Series and Muncie Symphony Series, special attractions, lectures, and convocations are scheduled. Programs on the Emens Artist Series and Muncie Symphony Series are open to regularly enrolled students without charge; for others, there is a nominal admission charge. Information about tickets and programs is available at the Emens Auditorium ticket office and online at www.bsu.edu/emens.

School of Music recitals and concerts by faculty and student soloists and groups, which are scheduled frequently, are open to the public. The Department of Theatre and Dance presents dance concerts and dramatic productions during the academic year and an outdoor Shakespearean production during the summer. Many departments schedule programs, visiting artists, speakers, debates, and group and panel discussions or reviews.

The Ball State University Museum of Art is one of the finest university museums in the United States. Its permanent collections and temporary exhibits are accorded national recognition. The program of exhibitions allows the students and the community to be aware of varied and current trends in art. It is located on the Web at www.bsu.edu/artmuseum.

The University Planetarium includes a 77-seat sky chamber and an exhibit hall. The star projector, still-image projectors, and video projectors are fully computer-automated. The planetarium serves approximately 2,000 astronomy students each year and presents educational programs that target Indiana state academic standards offered to visiting elementary and secondary school students. In addition, free programs are available to the public on selected weekends during the academic year. The observatory serves both a research and teaching mission. Two of the five telescopes are equipped with digital cameras used for research projects by both faculty and students. The observatory is open for public viewing of current sky phenomena after the planetarium presentations.

Ball State University fields varsity teams in 19 sports and is a member of the Mid-American Conference and the National Collegiate Athletic Association (NCAA), Football Bowl Subdivision; the men’s volleyball program is a member of the Midwest Intercollegiate Volleyball Association (MIVA). The facilities of the university are also available for individual and group activities. The Ball Gymnasium and Health and Physical Activity Complex contains courts for basketball, handball, volleyball, tennis, and badminton and facilities for other activities. The Lewellen Aquatic Center and the swimming pool at the Ball Gymnasium, as well as the Field Sports Building, outdoor tennis courts, and other field sports areas, are available for student use at regularly scheduled times. There is no fee for regularly scheduled athletic events or university convocations.
Ball State Bookstore
All regular graduate assistants and doctoral assistants are entitled to a 10-percent discount on purchases made at the Ball State Bookstore. To be eligible for the discount, a student must present his or her identification card, schedule, and contract at the time of purchase. The discount is not transferable to anyone other than the card bearer and does not apply to sale items, electronics, and consumables. Certain other restrictions may apply.

Ball State Federal Credit Union
University employees, alumni, students, and their relatives may take advantage of any of the financial services offered by the Ball State Federal Credit Union, 2900 N. Oakwood Avenue, and 1525 W. University Avenue, Muncie, Indiana.

Counseling Center
The Counseling Center offers a wide range of services designed to help students make career decisions, learn more effectively, and remove barriers to their personal and social development. The services include group counseling, individual counseling, outreach programs and activities, consultation, and training. The Counseling Center also houses the Office of Testing Programs that administers most national testing programs, including but not limited to, the Professional Assessments for Beginning Teachers (Praxis), Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), Law School Admission Test (LSAT), and the Medical College Admission Test (MCAT).

Disabled Student Development
The Office of Disabled Student Development (DSD) coordinates university efforts to provide access and opportunities to students with disabilities, including students who have disabilities that are nonapparent. Students wanting to learn more about services or accommodations available to those with a documented disability should contact the DSD office. Advance notice in planning services is strongly encouraged. Visit DSD's website at www.bsu.edu/dsd, or contact the office by phone at 765-285-5293, TDD 765-285-2206, or e-mail dsd@bsu.edu.

Health Services
The Amelia T. Wood Health Center offers preventive health care and medical treatment for students enrolled at Ball State University. Health Center services include the treatment of illnesses, injuries, and limited disabilities that require outpatient care, limited gynecological services, pharmacy, physical therapy, and health education. The Health Center does not attempt to replace a student’s private physician or assume total responsibility for a student’s medical needs.

The center is staffed with a medical team of licensed physicians, registered nurses, licensed practical nurses, medical assistants, certified physical therapists, and athletic trainers. The center is open for patient care from 8 a.m. to 4:30 p.m. Monday, Thursday, and Friday and 9 a.m. to 6:30 p.m. Tuesday and Wednesday during the school year. Summer hours are 7:30 a.m. to 3:30 p.m. Monday through Friday. Students requiring emergency medical service should call 911. For nonemergency after-hours care students may go to Ball Memorial Hospital Emergency Room.

Graduate students have no pre-admission health requirements and do not need to complete nor turn in the health form that undergraduate students are required to complete unless they are enrolled through the international program. The international program has requirements that apply to both undergraduate and graduate students.

All students enrolled in 7 or more hours are required to pay the mandatory health fee each semester. Students enrolled in fewer than 7 hours have the option of paying the fee or paying on a cost per visit basis. If a student wishes to pay the fee, he or she must contact the Office of Bursar and Loan Administration to arrange for this prior to the end of the drop-add period. Students are responsible for charges incurred for services from outside providers, i.e., emergency room, laboratory tests, x-rays, referrals, etc. Pharmacy services are provided onsite at a cost competitive with local pharmacies. Students may pay by cash or credit card or charging to their university fees bill.
Housing
University residence halls and apartments house approximately 7,100 students. There are two residence halls—Elliott Hall and Shively Hall—that offer floors for students over the age of 21. Elliott Hall is not open during break periods, whereas Shively is open during the semester and holiday breaks. Regular double rooms and a very limited number of single rooms are available. Residence hall contracts are for the entire academic year and include both room and meals.

Information and applications for residence halls are available from Housing and Residence Life, LA N-10, Ball State University, Muncie, IN 47306, and online at www.bsu.edu/housing.

University apartments are available in the Anthony and Scheidler complexes. Graduate students and undergraduate students living with spouses and/or dependent children have first priority for apartments. There are a limited number of furnished apartments. These apartment units provide an affordable living option for many graduate students.

Information and applications for the university apartments are available from the Ball State University Apartments Office, 3460 N. Tillotson, Muncie, IN 47304, and online at www.bsu.edu/housing/ua.

Career Center
The Career Center offers opportunities for each Ball State University student and graduate to develop a clear career objective, obtain relevant experience, and learn the skills necessary to conduct a successful professional job search.

The Career Center can help with career exploration and planning, the job search, curriculum vitae development, and resume writing. It also video-recorded practice interviews and individual career advising; coordinates all on-campus part-time student employment and some off-campus student employment opportunities; supports internship and programs; maintains a specialized resource collection that includes up-to-date materials on careers, salaries, the job-search process, and graduate and professional school test preparation; distributes career brochures and publications on self-assessment, career exploration, resume writing, interviewing, and job success; and, coordinates on-campus interviews with recruiters from business, industry, government, and educational organizations seeking graduates at all degree levels. For more information, call the Career Center at 765-285-1522; visit the office in Lucina 220; or visit the Web site at www.bsu.edu/careers.

Speech-Language and Audiology Clinics
Testing and therapy services related to speech, language, and hearing problems are the specialty of the Ball State Speech-Language and Audiology Clinics, operated by the Department of Speech Pathology and Audiology. More information can be obtained by visiting or calling the clinic office in AC 102, 765-285-8160 or by visiting the Web site at www.bsu.edu/spaa.

Student Center
NOTE: Due to renovation please check the Student Center web site www.bsu.edu/studentcenter for up-to-date information.

Student life starts at the L.A. Pittenger Student Center, located at the intersection of McKinley and University avenues, which is host to a variety of entertainment events and houses a variety of services and offices for the Ball State community. The Student Center houses a multitude of major student organizations serving the campus community, such as Student Government Association (SGA), Black Student Association, University Program Board, Late Nite, Interfraternity Council, Spectrum, the National Panhellenic Council, and others. Offices dedicated to advising and serving students and student organizations include: Student Life, Campus Programs, and Disabled Student Development. A variety of services that students, faculty, and staff depend upon daily also are located in the Student Center. In addition to the food court and Cardinal Lanes (bowling and billiards), the center offers a post office, barbershop, ATM, computer lab, meeting rooms for groups from five to 500, and hotel with 25 rooms. University Banquet and Catering is located on the second floor and can accommodate all your food service needs.
Vocational Rehabilitation Offices
The Vocational Rehabilitation Division of the state of Indiana provides a program of specific services to help disabled persons of working age become employable or more suitably employed. Students may apply for funds at their local vocational rehabilitation offices of at the Muncie office. Call 765-282-9863 for more information.

APPENDIX

ACCREDITATION AND PROFESSIONAL MEMBERSHIPS

Ball State University is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools.

The university is approved by the American Association of University Women and the Committee on Professional Training of the American Chemical Society and the American Speech-Language Hearing Association.

The university holds memberships in many professional organizations, including the American Association of State Colleges and Universities, American Council on Education, American Association of Colleges for Teacher Education, Council of Graduate Schools in the United States, College Entrance Examination Board, Council for Advancement and Support of Education, National University Continuing Education Association, National Association of State Universities and Land-Grant Colleges, National Association of Student Personnel Administrators, American College Personnel Association.

Architecture, Landscape Architecture, and Planning Accreditation
In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure in architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards.

Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree. In the Ball State College of Architecture and Planning, the professional degree programs of the Department of Architecture are fully accredited by the National Architectural Accrediting Board (NAAB). The professional degree programs of the Department of Landscape Architecture are fully accredited by the Landscape Architecture Accrediting Board (LAAB). The professional programs of the Department of Urban Planning are fully accredited by the Planning Accreditation Board (PAB).

Speech-Language Pathology and Audiology Accreditation
The master of arts in speech-language pathology and the doctor of audiology are accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association.

Business and Accounting Accreditation
Programs in the Miller College of Business are fully accredited by the AACSB International. The accounting program holds separate AACSB accreditation.

Fine Arts Accreditation
Programs in the College of Fine Arts are accredited by the National Association of Schools of Art and Design, the National Association of Schools of Music, and the National Association of Schools of Theatre. The Museum of Art is accredited by the American Association of Museums.
Family and Consumer Sciences Accreditation
In the Department of Family and Consumer Sciences, the dietetic internship is accredited by the Commission on Accreditation for Dietetic Education of the American Dietetic Association. The Department of Family and Consumer Sciences Child Study Center is accredited by the National Academy of Early Childhood Programs.

Nursing and Medical Education Accreditation
The Muncie Center for Medical Education is accredited as part of the Indiana University School of Medicine by the Liaison Committee on Medical Education, Association of American Medical Colleges. The programs in the School of Nursing are accredited by the Indiana State Board of Nursing and the National League for Nursing Accrediting Commission. The School of Nursing is accredited by the Indiana State Board of Nursing and Commission on Collegiate Nursing Education (CCNE), One Dupont Circle, NW, Suite 530, Washington, DC 20036-1120; (202)-887-6791.

Journalism, Mass Communication, and Public Relations Accreditation
The Department of Journalism is accredited by the Accrediting Council on Education in Journalism and Mass Communications. The public relations program in the Department of Journalism is certified by the Public Relations Society of America.

Teacher Education, Psychology, and Counseling Accreditation
All advanced education and licensing programs are accredited by the Office of Educator Licensing & Development the Indiana Department of Education and the National Council for Accreditation of Teacher Education (NCATE). The programs in school psychology are accredited by the National Association of School Psychologists. The doctor of philosophy degree with a major in counseling psychology and the doctor of philosophy degree with a major in school psychology are accredited by the American Psychological Association. The Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council on Postsecondary Accreditation (COPA), has conferred accreditation upon the master of arts program in counseling psychology, community track. The Counseling Center is accredited by the International Association of Counseling Services, and its internship training program is accredited by the American Psychological Association.

The program in medical technology offered through the Biology department is accredited by the National Accreditation Agency for Clinical Life Sciences. The associate degree program in radiography, offered through the Department of Physiology and Health Science, is accredited by the Joint Review Committee on Education in Radiologic Technology.

The Legal Studies Program offered through the political science department is approved by the American Bar Association.

The Department of Social Work is accredited by the commission on Standards and Accreditation of the Council on Social Work Education.
