Report Viewers using Argos Web Viewer

What’s New in the Argos 5.0 Release?

The Web Viewer has an updated interface suitable for a wide variety of platforms including PCs, Macs, and tablets (iPad, Android). Supported browsers include Chrome, Firefox, and Internet Explorer 9 or higher for PC; Safari and Chrome for iPad/Mac; and Chrome for Android tablet devices.

Navigate to http://my.bsu.edu

Choose Argos Web Viewer
Once the Argos Web Viewer page loads, log in with your BSU credentials.

You will be prompted to navigate through the new interface on your first login. You can skip this and find the tutorial at any time from the Help menu.

Once you have been through the navigation of the new interface, you may Begin Reporting.

Navigate to the 3. PRODUCTION - INB folder on the left.
Drill down to the appropriate folder where the datablocks will be listed. Select the datablock.
The datablock interface is now called the dashboard. This is where you enter parameters and run reports.
## Current or Future Term Major by Degree

### Instructions:
- In Banner curricula, FOS refers to a Field of Study which is either a major, concentration, or minor. To retrieve data for any FOS, the corresponding alpha code is required. If assistance is needed in identifying the exact code(s) for your departmental majors, concentrations, and minors, contact the Office of Academic Affairs, the Graduate School, or the appropriate UO Advisor Center.
- Concentration concentrations: If a major does not have any concentrations (options), it must be retrieved from the major report, not the concentration report.

### Term:
- Used to calculate class level, hours registered, etc.
- Student Level: Used to calculate class size, curriculum, etc.

### Class:
- Used to filter results, select any of the classes to see results.

### Populate Quicklinks:
- Click to populate all fields quickly.

### Table:
- Displays all majors, concentrations, and minors for a specific term.

---

### Options:
- Populate Quicklinks
- Filter by term
- Filter by class level
- Filter by program
Select the report you wish to run, select Run next to the Reports listing.
Depending on your browser, the report appears as a file to be downloaded or it may just open in a new browser window.

After the file is downloaded, it opens in a new browser window as a PDF for example if it is a banded report. This can be saved or printed. The CSV report will open in Excel.
When you are viewing the datablocks, notice the Star icon on the left. This indicates the Create Shortcut feature.

This is my shortcut because I see the padlock icon. The others are shared shortcuts.
While you are viewing the datablocks, notice the Share Symbol on the right. This icon indicates you can share the dashboard with someone by email. If you do this, the recipient will need access to Argos to view the link and report.

While you are viewing the datablocks, notice the Details Symbol on the right. This icon indicates you can see the details of the datablock.
On the left of the datablocks, notice the Recent tab. This will list any recent datablocks and reports. You can delete these as they become obsolete.
