Re: Summer Math Enrichment Program, Grades 1-6

During Second Summer Session of 2017, the Department of Mathematical Sciences at Ball State University will offer mathematics classes for which we will need some elementary age boys and girls for weekly lessons. These lessons will focus on enrichment activities for children of all abilities. They are intended to promote children’s interest in mathematics and to build their confidence. Note that the focus of these lessons is not on remediation. We invite and encourage you to involve your child(ren) in this free program.

Lessons are two hours long and are being offered according to the following schedule:
Second Summer Session (SS 2): 1:00 to 3:00 pm on Thursdays June 22, June 29, July 6, July 13, & July 20.

Children will need to be in grades 1-6 next fall. It is important that participants arrive promptly and agree to attend all five lessons.

The lessons will be conducted by college students in the Robert Bell Building, which is on the southwest corner of McKinley and Petty. On Monday, June 19 or Tuesday, June 20, college students will contact parents and explain the drop-off and pick-up location.

If you wish your child(ren) to participate in this opportunity, please complete and return the registration to the Department of Mathematical Sciences, Summer Math Enrichment, Ball State University, Muncie, IN 47306. Registration deadline is May 26, 2017 and a confirmation letter will be sent in June.

Additional registration forms may be printed from the following website: www.bsu.edu/math
