**Here’s How it Works**

Our Indemnity Medical insurance pays a cash benefit for hospital confinement. This benefit is payable directly to you and can keep you from withdrawing money from your personal bank account or your Health Savings Account (HSA) for hospital-related expenses. This is especially helpful since statistics show the average hospital stay is approximately 5 days, which can add up quickly. On top of that, the number of people who forgo or delay needed health care due to the high cost has nearly doubled in the past 10 years. These facts make it increasingly important to not only protect your finances if faced with an unexpected illness, but also to empower yourself to seek the necessary treatment.

With Allstate Benefits, you can feel assured that you have the protection you need if faced with a hospitalization.

**Are you in Good Hands? You can be.**

Your coverage may or may not include hospitalization due to pregnancy or complications of pregnancy. However, a newborn child’s initial confinement in a hospital and a newborn child’s routine nursing or well-baby care during the initial confinement in a hospital are not payable. A newborn child’s initial confinement in a hospital includes any transfers to another hospital before being discharged to go home.
