BALL STATE UNIVERSITY
INTERNATIONAL TRAVEL POLICY

Any University student or employee proposing to undertake University authorized international travel must follow the appropriate approval, insurance, and travel security requirements set forth in this policy. This policy applies to all Ball State University undergraduate and graduate students, employees, and others traveling internationally including but not limited to the purposes of: attending or participating at international conferences; international research, teaching, and administrative travel, with or without students; study abroad; internships; exchange programs; student group travel (of any duration and whether offered for credit or not); technical or educational assistance programs; faculty led programs and any other international travel organized under University auspices by academic departments or administrative units. This policy does not apply to travel outside of the United States for purposes of vacation, pleasure, study, or work outside the scope of University employment or programs.

I. Approval Requirements

A. All international travel proposals must first be approved in writing by the appropriate University authority which may be the President, Vice President, Dean, Department Chair, or Program Director.

B. All University employees traveling internationally must register their travel with Risk Management by completing the International Travel Authorization Form. Student travel and study abroad programs are reviewed and approved by the Rinker Center for International Programs and shall comply fully with Rinker Center established policies and procedures pertaining to international travel.

II. Pre-Travel Process

A. All travelers that are U.S. citizens must register their travel with the U.S. Department of State Smart Traveler Enrollment Program (STEP), a free service that makes it easier for consular officers in U.S. embassies and consulates around the world to contact travelers during an emergency including situations where family or friends in the U.S. are having problems trying to contact travelers with important news.

B. All student travelers must participate in the Rinker Center for International Programs orientation program for international study and travel abroad. Contact with the Rinker Center should take place on or before October 1st for spring
departures, and on or before April 1st for summer or fall departures. Faculty leading study abroad programs must arrange for a pre-departure orientation program for all program participants.

C. The Faculty Leader or the Rinker Center for International Programs will schedule a pre-departure meeting for all student travelers noting the appropriate documents needed for that meeting.

III. Insurance Requirements

A. All travelers in programs directly controlled, administered or funded to any degree by the University must carry the University’s designated medical, emergency evacuation, and repatriation insurance. The policy covers medical expenses and evacuation due to security/political unrest, natural disaster, and emergency medical situations. Note that this is supplemental coverage for the dates of travel only, and is not intended as primary health insurance. Students and faculty participating in BSU faculty-lead programs outside the U.S. and University employees completing the International Travel Authorization Form are automatically enrolled for this coverage.

B. Students traveling in programs not directly controlled and administered by the University must meet all the administrative and insurance requirements of those programs. If such a program does not provide comparable insurance as required by this policy then the student must self-enroll in the University’s designated medical, emergency evacuation, and repatriation insurance. The policy brochure is available online or by contacting the Rinker Center for International Programs.

IV. Countries on U.S. Travel Warning and Sanctions Lists

A. Ball State shall not sponsor, organize, facilitate, or encourage travel by undergraduate or graduate students to countries for which the U.S. Department of State has issued a Travel Warning. Travel Warnings are issued when long-term, protracted conditions that make a country dangerous or unstable lead the U.S. Department of State to recommend that Americans avoid or consider the risk of travel to that country. For a list of restricted countries, please go to: http://travel.state.gov/content/passports/english/alertswarnings.html

B. Ball State shall not sponsor, organize, facilitate or encourage programs for undergraduate or graduate students to countries for which The Office of Foreign Assets and Control (OFAC) has imposed economic and trade sanctions. For a list of sanctioned countries, please go to: http://www.treasury.gov/resource-center/sanctions/Programs/Pages/Programs.aspx

C. Any University employee seeking authority to travel to a country for which the U.S. Department of State has issued a Travel Warning or for which The Office of
Foreign Assets and Control has imposed economic or trade sanctions must complete an International Travel Exemption Request. Approval to travel to destinations for which a Travel Warning is issued or for which OFAC has imposed economic or trade sanctions must be requested at least 45 days in advance of the planned departure date. All such requests seeking authority to travel to a restricted country/region shall be presented to the University’s International Travel Oversight Committee (ITOC) for review and approval.

D. Factors considered in the review process include the necessity of travel; whether travel can be delayed or postponed; the nature of the activity; specific country risks; specific city/locality of travel; whether students are involved; sanctions and export control concerns; media reports; experience of person traveling; availability of local support and evacuation options; ability to communicate with traveler and travelers ability to communicate locally; contractual obligations to travel (if any) and other information as may be deemed relevant.

E. Authorization may be granted depending upon an analysis of current conditions in the country and may carry specific restrictions, including a signed release in which the traveler acknowledges the heightened risk, assumes all risk, and releases the University from all liability. After authorization is granted and at any time before or during the actual travel, ITOC reserves the right to seek additional information from the traveler regarding the trip or conditions, impose additional restrictions on the travel, or rescind the authorization and cancel the travel should conditions in the country deteriorate.

F. Persons traveling to destinations under a Travel Warning without permission or who choose to remain in those destinations after being advised by the University to evacuate are not eligible for University funding or academic credit and may be subject to restrictions in other benefits or services and discipline.

V. Right to Amend, Suspend or Cancel Travel

The University reserves the right to amend, suspend or cancel a program or other travel (prior to departure or in progress) if facts and circumstances are such that the University concludes that the traveler’s health, safety and well-being may be jeopardized or would be inconsistent with applicable U.S. government sanctions or export control laws. Financial loss resulting from such cancellation is primarily the responsibility of the program participants.

VI. Contractual Authority

Faculty, staff, students, student groups, departments, and other units at Ball State cannot organize travel as a Ball State unit with a third-party provider (i.e. not the University) or enter into a contractual agreement with an outside vendor (travel agencies, tour operators, other universities, charitable or humanitarian organizations, etc.) without the consultation, review, and approval of the Office of Business Affairs.
VII. **Traveling with Laptop Computers and Mobile Electronic Devices**

A. U.S. export control laws may prohibit or restrict taking laptop computers, communications equipment, mobile devices (such as smartphones, GPS equipment, PDAs, etc.) information storage devices and/or many other forms of technologies (ex. Google Glass, biological agents, etc.) to foreign countries. These laws govern any technologies that may contain encryption software, source codes, restricted technologies (ex. infrared sensors, surveillance equipment) or any information that is considered classified and/or under control by the U.S. Government. Travelers considering taking such devices and/or information abroad must comply with U.S. laws and the laws of the country to which they are traveling.

B. Travel to countries for which OFAC has imposed economic and trade sanctions involve a greater risk of export compliance violations due to more restrictive U.S. export control regulations. Custom officials in these countries have the right to examine any devices any information contained therein and have the right to hold/confiscate such if found to be in violation of U.S. law, international law, or the laws of your host country (which may be significantly different than U.S. law).

C. Export compliance is managed by the Office of Research Integrity (ORI). All travelers must work with ORI as their international travel plans are being developed in order to quickly identify any issues that may arise.
